To hatch a chicken by noising an egg for the allotted time in the left armpit is believed in Serbia to be a certain charm against violent death, more especially if the bird be swallowed whole forty days after it comes to life. A robber who had devastated the district of Kolubara for many years, was writes a Belgrade correspondent, known to have accomplished both these feats, which accounted for the apathy of the peasants in pursuing him, persuaded as they were of his invulnerability. He was finally, however, killed by the mounted police, thus discrediting a time honored Serbian superstition.

EGGS DROP AGAIN IN MARKET PRICE

Further decline is noticed in the chicken market since the high price records of a few days ago. The reaction has now fully set in and the tone is generally weaker than it has been for sometime.
The spud trade, too, is quite in the markets, a fractional reduction in

price being noted. The egg supply and demand have been fluctuating with differences of opinion as to the actual condition of the trade.

The American Adding Machine

The Latest Adder
Costs But \$35
See our exhibit-ask for 10 days trial

Here is a new price on a competent Adder. On a machine that is rapid, full-sized and infallible.

The very latest machine, built by men who know, in one of the largest metal-working shops.

It is an individual Adder to be placed on one's desk, close to one's books and papers. To take the place of the central machine requiring skilled operators.

It is also intended for offices and stores where costly machines are a luxury.

The price is due to utter simplicity, and to our enormous output. Seven keys do all the work.

Each copied number is shown up for checking before the addition is made.

The machine will add, subtract and multiply. With very slight practice anyone can compute a hundred figures a minute. And the machine never makes mistakes.

Countless offices, large and small, are getting from these machines the highest class of service.

Now we make this offer so that offices everywhere may learn what this machine means to them.

Ten Day's Test

We will gladly place in any office one American Adder for a ten days' test.

There will be no obligation, and charges will be prepaid.

Compare it with any non-lister—even the costliest. Let anyone use it. See if any machine can serve better than this!

Just send us this coupon and we'll send the machine.

F. W. DANNATT, Manufacturer of CARBON-NIT, 1656 Winfield St., Los Angeles, Cal. January 13, 1913.

Dear Sir: The fact of the base of your CARBON-NIT being a light lubricating oil convinced me that it is absolutely harmless to use in the cylinders of all gasoline engines.

After successfully running your fluid through my Fiat, I am now in position to recommend CARBON-NIT to all owners of automobiles, motorcycles, motorboats and stationary engines.

Very truly yours,
TEDDY TETZLAFF.
