DRUGS EXCITE YOUR KIDNEYS, USE SALTS

If your Back is aching or Bladder bothers, drink lots of water and eat less meat.

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salts which removes the body's urinous waste and stimulates them to their normal activity. The function of the kid-neys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kid-

nevs active Drink lots of water-you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kid-neys; also to neutralize the acids in

urine so it no longer is a source of irri-tation, thus ending bladder weakness.

Jad Salts is inexpensive; cannot in-jure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep their kid-

WHY AMERICAN CITIES SHOULD PURCHASE PARKS.

No Longer Considered a Luxury, but, Like Streets, a Necessity.

One of the latest cities to secure general plan reports, joining in with the leading American cities in securing such general schemes of development, is New London, Conn. The report contains the following reasons why every

city should acquire parks: "There are at least four reasons why cities should now act in a large way in acquiring and improving land for use as parks and playgrounds: First.—Property is steadily increasing in value. It is not likely to be cheaper than it is now. Second .- Once bought, park lands increase in value. All other public works depreciate; parks apat any price. Hub Grocery, on the preciate. Third .- Parks pay for themselves or more than pay for themselves Miss Lena Spatz and Gottlieb A by making new real estate values. Some examples in support of this state ment are given in the appendix. Fourth.-A sound park policy vigorous- from admission to the United States ly pushed by public authority soon was overruled today. She was ordered brings rich gifts from private individuals. The history of American city parks furnishes much evidence in support of this tendency. Cities that own few parks seldom receive gifts of parks. On the other hand, some cities that have a long and honorable record in public park making have an equally long and honorable record of private gifts for parks.

"Parks are no longer considered a luxury by growing American cities. They are classed with streets and sewers and schools as a necessity. They contribute directly to health and efficiency, to pleasure and economic wealth. Moreover, they stir and nour-Ish civic pride."

WORRY.

Ungovernable worry is liable to lead a person to insanity and even to death. There must be a way of taking worry so that it shall do us good and not harm. Worry, rightly taken, should train to quietness, humility, patience, gentleness, sym-

VERA VRUZ, Mexico, Oct. 20 .- Despite all his promises to the contrary, tions like this to answer, she has it was considered practically certain found a puzzle. The only way out of today that Provisional President Huerta will be a candidate to succeed him- to ask that center of information self at the election next Sunday, Oc-

The constitution prohibits the same president from serving two terms in that she will be able to use in her succession, but Huerta presumably school work. will resign in a day or two, to make a break between his two periods of office holding.

That he will announce his candi- across the continent, from people who dacy immediately following General want to learn more of the land to Felix Diaz' arrival here, was the general expetctation. It was said General they plan to some day build their Blanquet will run with him for vicepresident. Blanquet was born Spain, and consequently is ineligible to the presidency, but it was doubted if a mere technicality like this would interfere with the program.

Ex-Minister of Foreign Affairs Gamboa, the Catholic party's candidate, was counted on to retire from the race with the announcement of Huerta's candidacy. He has been considered completely under the latter's control

Manuel Calero, the liberal candidate has small support, and is not a sericus rival of any other prospective can-

Felix Diaz, however, it was believed, may prove embarrassment to Huerta, if he decides to make the campaign, and it was for this reason that his friends expressed much anxiety concerning his safety. They announced that he would not run if Huerta aspires to the office, but this statement was deemed purely perfunctory.

WASHINGTON, Oct. 20.-The New centricities the novelist would have York immigration authorities' order excluding Mrs. Emmeline Pankhurst admitted immediately.

It was stated at the White House that Mrs. Pankhurst will be given freedom on her own recognizance. Secretary of Labor William B. Wilson said he entertained serious doubt as to whether Mrs. Pankhurst's acts in England consitituted moral turpi tude, adding that if she broke

laws of the United States she could

easily be arrested, Commissioner General Caminetti then ordered Mrs. Pankhurst's release President Wilson conferred at the White House today with Commissioner General of Immigration Caminetti concerning Mrs. Pankhurst's case.

Rotundity of Earth.

We are assured by competent authority that Thales of Miletus taught that the earth was of globular form so early as 640 B. C. Pythagoras demonstrated from the varying altitudes of the stars that the earth must be round. Aristarchus of Samos maintained that the earth turned on its own axis and revolved about the sun, which doctrine was held by his contemporaries as so absurd and revolting that the philosopher nearly lost his life B. C. 280. The wisdom of the ancients was, of course, lost sight of in the darkness of the "middle ages," and it took Galilei and Copernicus to restore the old knowledge to the world.-New York American.
