FIRST CONTEST PLANNED NO DATES ARE BOOKED

NEXT WEEK

The first game of girl's basketball this season will be played Monday evening when the junior and senior girl's teams of Oregon City school will clash on the floor of the

school gymnasium. The girls have been hard at work of the school have four teams: Sophmore, junior and senior teams and one representing the entire school. Several games have been arranged between the various teams within the school but it is probable that there will be no contests with outside ganizations.

CAMP CHOOSEN

PORTLAND. Ore., Dec. 13.-Beavers at Santa Maria. Colts alternating between Chico

and Santa Rosa. These are the best bets for Portland's spring training camps ,news of their practical selection being brought back last night by Manager Walter McCredie, of the Beavers, and Manager Nick Wiliams, of the Portland Both of the big fellows rolled in on the Shasta and neither is bulging with food for the fans.

MATCH ARRANGED

LOS ANGELES, Dec. 13.-Leach Cross and Bud Anderson are matched today to furnish the New Year's fight card at McCarey's Vernon arena. The men will weigh 135 pounds two hours before the fight. Both will begin training tomorrow.

CAPTAIN STANLEY TO SPEAK

Willamette, Ore., Dec. 13.—(Special) -Captain Stanley, "rapid fire orator" will speak Monday evening at the First Methodist church in this city. Mr. Stanley has appeared before several Clackamas county audiences, including Oregon City and Canby.

POSTOFFICE ENLARGED

Molalla, Ore., Dec. 13.-(Special)-The work of enlarging the Molalla postoffice about 500 per cent has been completed. The interior of the building has been completely changed with the object of making the arrangement better for the handling of the mail. It is thought that there will be a greatly increased amount of mail matter since the opening of the new road.

SPORTING BREVITIES

There is no much chance of the Seals getting Jimmy Johnston. Branch Rickley, St. Louis Brown's manager, is sweet on the "speed king," and has already made an offer to C. W. Murphy

for the services of the player. The Athletics were the only team in the big league that was able to score more runs in 1913 than in 1912. The world's champions scored 794 runs last season. Chicago led the Nation-

al League with 721 scores. It is almost a certainty that "Long Tom" Hughes, Washington pitcher, wil be a member of the Angels next season. According to Hen Berry the deal is all cut and dried. Berry fur-

ther states that he will get two more twirlers from the Nationals . Henry Bebby says that he is after Barker, a young pitcher, and Allan and Calvo, outfielders from the Washing-Ellis and Krueger are not sure of their jobs and either or both may be looking for other jobs next

For Public Orators.

Knowing whereof I discuss. I beg to admonish students of public speaking to avoid as far as possible the use of the following phrases: I rise with diffidence. Unaccustomed as I am to speak. By a happy stroke of fate. It becomes my painful duty. In the last analysis. I am encouraged to go on. I point with pride. On the other hand (with gesture). I hold. The vox populi, Be that as it may. May that as it be. I shall not detain you. As the hour is growing late. Believe me, Mabel. We view with alarm. As I was about to tell you. The happlest day of my life. It falls to my lot, I can say no more. In the fluff and bloom. I can only hint. I can say nothing. I cannot find words. The fact is. To my mind. I cannot sufficiently do justice. I fear. All I can say is. I shall not inflict a speech on you.-Washington Herald.

Educating Father. They're educating father In the way to march the aisle. They've trained him to look solemn, And they will not let him smile. They've taught him how to hold his hand They're educating father How to give the bride away.

USE OF SLAG IN

Better Than Stone For the Macadam Highway.

ROAD BUILDING

SPARE ROLLER, SPOIL ROAD

Plenty of Water Absolutely Necessary In Manufacture of Slag Roads-Slag Is Cheaper, Lasts Better Under All Conditions and Is Easier to Get.

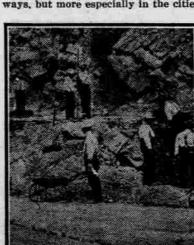

To construct a highway correctly proper excavation should first be made and the subbase thoroughly well rolled with a roller of at least ten tons in weight. This should be done no matter what kind of base material is used. However, in the construction of a slag road, in order to obtain the very best results, it is necessary that the loose slag be spread on the subbase to a proper depth and then thoroughly rolled from time to time as the work

progresses. During such procedure it is recommended that the road be kept well wet with water, if water is available, and turn. in finishing it is only necessary to put on top of the siag base about two inches of slag screenings, which contain dust and slag particles as large as onefourth of an inch, which, like all ce-

ment, is inert in the dry state. This likewise should be thoroughly wet and well rolled. In fact, the top should never be put on except with plenty of water and thoroughly rolled. This is necessary because of the natural cementing qualities of slag, and in order to get it properly bound this ma-

many voids as possible. A slag road built under these specifications, instead of deteriorating, as is too often the case with most other road metals, will gradually improve until the entire roadbed becomes a solid mass, thereby giving-practically a con-

It is sad indeed to watch road forces at work, not only along country highways, but more especially in the cities,

CUTTING SLAG FOR ROAD WORK.

where there are macadamized roads. for the waste of time and material is something appalling.

Streets are repaired merely by throw ing loose sing or some other material into the ruts and, instead of finishing the job by rolling and compacting the material, making it more or less per-

to remain, and vehicles passing over cipal ceremony consists of passing it, instead of compacting the filling, through an opening made in a wall adwill cause the particles to grind into joining the shrine measuring 5 by 21/2 dust, which will be carried off either feet and always fervently called "the by the wind or by rapidly moving augates of paradise." Whoever between tomobiles, leaving the street in as bad noon and night is able to pass through this opening is assured of paradise, is cheaper as a rule than all other road pass through at the same time the

condition as before it was repaired. bases, but it is available in large quantities and at all times, regardless of the faint, bones are broken, and the heat weather. The rainy season has no effect on the shipment of slag, as is the case in the rock quarries and gravel pits, and by reason of the fact that it is usually loaded at points where a number of railroads center cars are available when such is not the case at quarries and gravel pits located exclusively on one line.

The advantages to be derived from the use of slag in building highways may be analyzed as follows:

It is a natural cement rock. It will cement together if properly compressed by wetting and rolling. It is, as a rule, vastly cheaper than

any other road material. It is available in large quantities and at all times, regardless of weather con-

It is an impervious material. It is considerably lighter in weight than stone or gravel, consequently a great saving in freight is effected where distances are equal.

A New Road Material

A new road material designed to stand hard usage from automobiles is being tried by a Swiss engineer. W Erlich, and is said to consist of a mixture of broken stone about the size of & bazelnut, but not timestone, with a binding material whose compo not divulged by the inventor. In the present process the stone is heated at first from 100 to 150 degrees C. and mixed at this temperature with the melted composition. When in use the mass is remelted in order to put it on the road. A road roller heated to a rather high point is passed over the surface, the roller weighing about six tons. Peports state that a very good road surface can be obtained in this

Humanizing Houses. Houses are curious things. We take a morsel of illimitable space and wall It in and roof it over. Suddenly it ceases to be part of God's out of doors and becomes an entity with an atmosphere of its own. We warm it with our fires, we animate it with our affections, we furnish it with such things as seem good in our eyes. We do this to get shelter for our bodles, but we acquire as well an instrument for our spirits that reacts on us in its

In other words, as we live our way into a house, adapting it to our need, the bricks and mortar, the paint and plaster, cease to be inert matter and become alive. Superficial sociologists have taunted women with being "more anabolic or plantlike" than man, but I count it her second glory. The plant is an organism that "slowly turns lifeless into living matter," and this is the thing that woman has done from the beginning with her shelter. In our houses we achieve almost an organic terial must be rolled to eliminate as extension of our very selves.—Cornelia . P. Comer in Atlantic.

Ortolans as Food. The ortolan, a bird smaller than our

quail, an inhabitant of southerh Europe in summer and of Africa in winter, is highly prized, especially among French epicures, for the delicate flavor of its flesh. The ortolan is netted alive, kept in a dark place and fed on millet, oats and other seeds until it becomes enormously fat, when it is killed for the table. This artificial fattening of the ortolan dates back to ancient days of Rome. A Parisian paper tells of a financier who invited four friends to a dinner at his country place and sent to Paris to a famous restaurateur to provide a feast for six persons. When the account was presented it footed up 1,200 francs-that is, \$240. "Outrageous!" said the financier. "Monsieur," said the restaurateur, "you have had twenty ortolans at 25 francs each. That alone is 500 francs." This would be much like paying \$5 each for well fattened Eng-

The Gates of Paradise.

Once in a year and at one place in the world there is a crush that surpasses anything else of its kind in the world. It is the great fair of Bawa Farid, which is annually held in the town of Pak Pattan, in British India. It is held in honor of the famous St. Farid ud Din, surnamed Shakar Gani, or sugar store, from the fact that his body had become so pure by continual fasting that whatever was put into his mouth, even earth and stones, was in manent, the loose material is allowed stantly changed into sugar. The prin-

Slag is the one material that not only and when there are 50,000 striving to pass through at the same time the crush is something terrific. Women

This Set is Yours

If you send in a year's subscription to the OREGON CITY ENTERPRISE. It makes no dif-

ference whether it is yours or your neighbor's, or whether it is new or old. Send in the sub-

scription and we will send you the set by return mail. We have only a limited number of

these and the offer will close December 31 unless we run short before that time.

No Team Work In France. The French nation is a mass of individual particles, scintillating, assertive -strangers to all the ethics of cohesion. They are incapable of team work, writes Samuel P. Orth in the Atlantic. You never read of French football or baseball or organized sports. They are a nation of individualists, brilliant individualists. Their philosophy, poetry, art, music, science, literature, all bear the imprint of a superindividualism that has filled the world with its radiance. They defy every known law of human gravitation and fly off in a million fragments, careless of results. In truth, they never think of results. They have the child's love for the doing and the child's scorn for the thing done. They begin more processes, inventions, contrivances, experiments, and end fewer than all the rest of Europe put together. The French propose; the Germans and the English dis-

Heavy and Light.
"I see that a French scientist is using electricity to make men fat," said the Old Fogy.

"Huh," commented the Wise Guy, "1 thought electricity was used to make things lighter."-Cincinnati Enquirer.

Ashland will be more on the Oregon map than ever after next year, even if it is close to the edge of the state.

That is a good idea, for the city to cows 6c; bulls 4 to 6c. do more public improvement work in the winter season, when many men need employment.
