BOARD OF ENGINEERS TO MEET AT

PORTLAND MAY 11.

Decision on Plans Will Then Be Reached -May Modify Harts Plan to Keep Within Limit - Will Also Examine Route-Scheme for Continuous Canal From Big Eddy to Celilo.

Washington, April 15.-Representative Moody, before leaving Washinghad a final conference with the members of the Board of Engineers having under consideration the opening of the Columbia River from The Dalles to Celilo, and was informed that the Board will meet in Portland May 11 to consider more fully all data that has recently been collected by Major Langfitt regarding the portion of the river to be improved.

Mr. Moody says that, while it is im-possible to say what the Board will finally report, its conclusion will depend upon calculations to largely be based on data that has been com piled by Major Langfitt, bearing on the several modifications or substitution for the Harts' project. Mr. Moody also had under consider-

ation with the engineers the removal of one of the reefs at Ten-Mile Rap-ids, with a view to facilitating steamboat navigation up to the lower end of the proposed state portage road. That proposition will be considered Board will propably visit the obstruc- save her. tions in the river and will determine for itself the need of blasting on this reef. Having viewed the river during the Summer, the Board at its coming meeting will have opportunity One of the Spanish Ships Sunk by Dew to see the stream at the high stage of the water and form a better idea of the volume of water to be controlled.

The Board will make an extraordinary effort to devise a practical plan that can be carried out at a cost not exceeding Captain Harts' estimate for about 80 of her crew were found in his original scheme, and there is some hope that such a plan may eventually be found. In the light of an officer, for it had a sword by its. data that has been collected by Ma- side. There are fifteen shell holes in Jor Langfitt, the Board will be able closely to estimate the cost of the the hull of the Reina Christina, one several modifications of the Harts' smaller. The main injection valve is project that have been proposed and will also be able to estimate the cost of other schemes that have been fair condition.

brought forward by other engineers. Mr. Moody has urged that if the Harts' plan in an amended form is not agreed upon, the Board seriously consider the proposition of a contin-nous canal from the Big Eddy to Celilo, and determine whether or not such a canal can be built by making use of natural channels through the rocks to the south of the river, at a way of the Suez Canal in June. cost not greater than Harts' estimate. This suggestion will be investigated to raise all the sunken Spanish warand, if it proves feasible at reasonships. able cost, may be accepted, as the advantages of a continuous canal are recognized by many of the officers.
