## A NEW ORLEANS RIOT

### ONE POLICEMAN FATALLY HURT AND MANY SERIOUSLY INJURED IN STREET CAR STRIKE.

Effort to Operate a Car Failed and No Further Attempts Will Be Made Until Troops Are Present.

New Orleans, Oct. 8.—The first attempt to run cars from the Canal street barn, which was made at 10 o'clock this morning, resulted in a serious riot, in which Policeman Schlessinger was shot through the head and probably fatally wounded; Conductor Kennedy was shot in the hand; Motorman Ferguson, a striker, was shot through the arm and a number of policemen were painfully wounded by flying missiles.

The first car which started from the barns was in charge of Motorman Fred Nintz, of Chicago, and Conductor M. L. Kennedy. There was on board a large force of policemen, and Peter Johnson and Alfred Clark, who arrived here last night from Chicago with a force of 30 men to take the places of the strikers. A large crowd was on the street, members of the mob rushed out, tore up planking from either side of the street and threw it across the track. Then bricks and stones flew through the air. Obstructions brought the car to a standstill, and a rush was made for the nonunion men on board. There was such a hail of missiles that the police and others on board had to stoop to save themselves.

As the car stopped, a number of policemen jumped off in an attempt to press back the strikers. Immediately a shot was fired. Then a perfect fusillade of shots came from both sides, and the car was enveloped in smoke. In the meantime R. D. Kountz, a young man from Luray, Va., who was on the car, ran out and attempted to clear the track of the planks and debris. He was pelted with bricks and stones, but was perfectly cool; and had pretty well cleared the track when the mob descended on him and overwhelmed him.

Clark and Johnson fell from the car and were terribly beaten before the police could fight off the mob and rescue them. Police reinforcements were rushed to the scene, and after a long struggle the space immediately around the car was cleared. Motorman Nintz is charged with having fired the first shot. Orders for his arrest have been issued. After the rioting, the car was run back to the barn, and it is now said that no further efforts to operate cars will be made until the troops are on the scene. The mayor is endeavoring to reach Governor Heard.

All of the nonunion men who were on the car attacked today were armed, and all of them are said to have used their weapons during the attack. Alexander Derbs a laborer and bystander, was shot in the leg during the rioting.

It is said warrants will be sworn out in the Federal court against many of the men who participated in the rioting yesterday, on the ground that the service of the mail cars was interrupted. Secret service agents from Washington are reported to be here and co-operating with the local police officers.

One hundred and twenty members of the police force guarded the barns of the railroad company during the night. It was feared that some attempt might be made to fire them.

A number of men who were all from Chicago are reported to have been captured by the strikers and to have deserted to the union.

San Francisco, Oct. 8.—The gunboat Bogota, the vessel of the Colombia government, which has been fitted out here for some time past, sailing for southern waters yesterday afternoon. She has an all-American crew, and both officers and men have "pasts" in which fighting has been the dominating characteristics. Her officers have been trained in the science of modern warfare, and her sailors nearly all hold discharges from the United States navy. The Bogota's crew is about 40. Twelve of her sailors were with Dewey at Manila, and several of them should now be serving Uncle

Sam on the battle ship Oregon. In the Bogota's crew are three graduates of the United States school of gunnery.

The Bogota before sailing, mounted a 14-pounder in her bows. She has four rapid fire six-pounders on her quarter deck, two Maxim-Nordenfelts amidships and two Colt automatic field guns mounted on her superstructure.

"We're Americans, every one of us," was one sailor's farewell message. "We would not be much credit to a Sunday school, and some of us could not get jobs in banks, but we can lick any bunch of our weight and numbers in white, and all the 'niggers' Central America can stack up against us. We'll get the Padilla."

### A Typical South African Store.

O. R. Larson, of Bay Villa, Sundays Riverr, Cape Colony, conducts a store typical of South Africa, at which can be purchased anything from the proverbial "needle to an anchor." This store is situated in a valley nine miles from the nearest railway station and about twenty-five miles from the nearest town. Mr. Larson says: "I am favored with the custom of farmers within a radius of thirty miles, to many of whom I have supplied Chamberlain's remedies. All testify to their value in a household where a doctor's advice is almost out of the question. Within one mile of my store the population is perhaps sixty. Of these, within the past 12 months, no less than fourteen have been absolutely cured by Chamberlain's Cough Remedy." This must surely be a record." For sale by Graham & Wells.

### At Monroe.

The new \$1500 school house being erected here is almost completed. Painting began on it Saturday.

The new structure is a handsome two room affair with a large basement, and is quite an improvement over the old shack which has done duty for thirty years. Probably when this is ready for use, the district will not be compelled to beg for applications for a teacher, as has been done in the past.

Prune picking was completed in the McElroy orchard Saturday. The yield is about one-third the average crop, but the quality was first class.

L. F. Watkins is moving on to the Jolly farm near Bellfountain.

Sid Y. Evans is moving his family from Eugene back to the farm.

Mr. Downing and family are moving to the McElroy place.

Rev. J. H. Skidmore is moving his effects to Monroe. The new residence is about completed.

Miss Minnie Pfauts is in Eugene.

Miss Corlie Starr has secured a school in north Benton county for the winter.

M. M. Waltz and family, and Wilbur Starr and family, are sojourning a Nye Creek.

Maria Howard will have a cottage erected on her recent purchase west of town.

J. H. Starr and wife are down from Eugene on a visit.

New Orleans, Oct. 7.—Violence started with the first attempt of the railway company to carry out the order of the mayor to run its cars today. Just before 7 o'clock the company started out three cars from the barns on Canal street. On each car, manned by a nonunion motorman, there was a police force. Crowds of strikers and sympathizers were on the streets. When the cars reached Miro the tracks were blockaded, and when they came to a stop the crowd made an attack. A pistol shot was fired and the nonunion man attacked. One of them, a conductor from Chicago, was badly beaten.

When the rioting spent itself 3 cars were left standing upon the track guarded by policemen. All the windows were smashed. The mob captured the conductor and his motorman and both consented to join the union. Some of the policemen were hurt by flying stones. When news of the rioting reached the City hall the mayor issued a call for a meeting of the police board. It is understood that the object is to swear in emergency policemen. Governor Heard will order out the militia when he is notified by Mayor Capdeville that the situation is beyond his control.

### COLLEGE CLASS GIVES FOUNTAIN TO THE AGRICULTURAL COLLEGE.

The Football Team Is Lighter but Faster—Men Hard at Work for Places on First Team—New Pastor—Bills Allowed.

The unveiling of a fountain on the college grounds will be an incident of next Wednesday's dedication exercises at the college. The fountain is to be located about 40 feet eastward of the spot where the main walk forks at the east entrance to the college campus. It is the gift to the college of the members of the class of 1902, and is to be a monument of their graduation. There are a dozen or more of the members of the class in town, and it is expected that a much larger number will be present and attend the unveiling.

The fountain is the figure of a female, pouring water from a pitcher into an urn. When it strikes the urn the water flies off into a circular spray. Around the base are 33 small jets that play when the fountain is in operation. The figure stands six feet, two inches high, and it is to be placed on a base 10 feet in diameter. The figure is of metal, enamelled white and it weighs 450 pounds, and its list cost with base was \$350.

### Football Men

It looks now as though O. A. C. would put out a formidable football team this season. After several years of innocuous desuetude in such matters there seems a revival on the hill of interest in the game. Every evening from four to half past five or six from 30 to 40 young men of bulging muscle and hefty avoirdupois line up against each other on the gridiron and work conclusions at a large outlay of exertion. So far, there are but two old O. A. C. men on the team. These are Burnough at center and Captain Gault, who plays now at tackle. All the rest, barring such as played more or less on last year's team, have yet their spurs to win. As a whole, the team is scarcely so heavy as O. A. C. usually turns out. Coach Herald expects, however, to educate them to make up in fastness of play whatever they may lack in avoirdupois. As to the new men, it is not yet determined which of them will take places on the first team. Pilkington at tackle plays a formidable game, and it is practically understood that he is certain to be chosen for that position. Root, a big man from Eastern Oregon, who gets over the field like a 11-second man and Williams who played the position last year, are candidates with fair show of success for halves. Abram and Bowers seem in a fair way to play guard and Nash is playing a good game at full. As to the other positions, for all of which there is abundant material, but little can be guessed.

This afternoon on O. A. C. field, the men will line up for an exhibition practice game, where those who wish to know more of conditions can have opportunity to see for themselves. The play will, undoubtedly be interesting, as the men who will play in the second team will put up a strong defense of their goal, and possibly do more.

### New Pastor

Rev. John Reeves, wife and young daughter, arrived Monday from Winchester, Kentucky, and now occupy the parsonage of the M E church, South. Rev. Reeves is the new pastor of the local church of the Southern Methodist denomination, appointed to the place at the recent meeting of Columbia conference. Rev. Reeves is a preacher of fine reputation and ability, according to the statement of Bishop Duane, who presided at the recent conference. He was born in St. Louis, Missouri, 53 years ago. His literary education was obtained at Cincinnati, Ohio. He was called to the ministry in the M E church, South, in 1871, and has been a member of the Kentucky conference for 31 years.

In his experience Rev. Reeves has served in every capacity known

to a minister of the Methodist denomination, save as a delegate to the general conference. He has been in every position from a mountain mission to presiding elder of the leading district in the state, and secretary of the conference. Mr. Reeves said yesterday that he had come to the west to identify himself with the work on this coast, and to become one of its people.

Rev. Reeves occupies his new pulpit for the first time tomorrow morning at 11, and will preach again in the evening at 7:30.

New York, Oct. 5.—The "American's" proofs of the existence of a local trust and petition for the prosecution of the combination under the Sherman anti-trust law are today before President Roosevelt and Attorney-General Knox.

Mr. Knox lately reported to the president that he could find no evidence against the coal roads as a trust to bring them within the scope of the Sherman law.

"The 'American'" now supplies the proof from documentary evidence.

The Industrial Commission's report, filed this year, after investigation of the trusts, expressed the belief that only an illegal combination of the coal roads existed. The "American" is able to put into the government's hands the actual facts of the combination's formation and unlawful operations. The very signatures of the officers of the companies in the coal trust to an agreement made for the illegal purpose of monopolizing the anthracite trade are a part of the evidence.

It is then shown that these companies, prior to 1901, mined and sold 70 per cent. of the supply and individual operators the remainder. The railway, then by agreement, charged as freight 40 per cent. of the f. o. b. price of coal at tidewater.

Application was made to the New York State Railroad Commissioners for a charter for the Delaware Valley and Kingston Railroad, to run from Kingston, on the Hudson river, to Lackawanna, and connecting with the railroad owned by the Pennsylvania Coal Company, which has branches throughout the Wyoming coal field. This new road would have broken the control of the railroad trust over freight rates. The railroads in the coal combine took steps to throttle this competitor.

The Temple Iron Company was a Pennsylvania corporation that operated furnaces at Reading, Pa. It had nothing to do with coal mining. The coal roads bought control of the company's stock. It had a capital stock issue of \$240,000. These railroad companies executed and signed an agreement with one another and had the Guaranty Trust Company of New York to guarantee the stocks and bonds of the following companies: Delaware, Lackawanna and Western Railroad Company, Central Railroad of New Jersey, Reading Company, Lehigh Valley Railroad Company, New York, Susquehanna and Western Railroad Company.

The purpose of this increase of capital was to buy up the principal independent coal mine operators who were behind the new rival railroad scheme.

The "The 'American'" will also prove, for the sake of furnishing concrete acts of the trusts in violation of the Sherman anti-trust law, that in March, 1901, a meeting of the Iron Temple Company's directors was held, at which it was agreed to maintain a uniform price for coal mined in Pennsylvania, transported from Pennsylvania to New York and sold within the state of New York, during the month of April, 1901, the price per ton to be: Grate, \$4; egg, \$4.25; stove, \$4.50, and chestnut, \$4.50. Coal was sold, according to this agreement, throughout the month of April, 1901. These prices were higher than would have prevailed but for the excellence of the combination described, and higher than in the year previous. Like action, taken in April of this year, is also shown.
