The accounts are that the trees all over the orchard are heavily laden with the embry crop.

—A telegram received Thursday morning, notified Chief Alexander of the death of his aged mother at Vancouver. Nothing of the kind was expected, and the intelligence came as a surprise and a shock. No details were given in the message and the cause of death is not known. Chief Alexander left at once to attend the funeral. His mother was about 80 years of age. She had resided for many years in Vancouver and vicinity.

—Charles Kennedy, for years a passenger conductor on the old Oregon Pacific railroad was in town for a few days Thursday. Since he left the Yakima road, 10 or a dozen years ago, he was until recently a freight conductor on the O. R. & N. between Portland and The Dalles. Sometime ago he left the O. R. & N. for another employer, and for the present has a lay-off for a visit with old friends, of whom he has many in the Valley.

—The bridge and fill at Stewart's Creek, three miles north of Corvallis is practically completed. It was inspected by the county judge and surveyor yesterday. The improvement makes an important change in the arrangement of the road materially reducing the grade, and is much commended by those who travel it. The grade was formerly a one foot rise in eight feet, and is now reduced to one foot in twenty. That is to say, it is reduced from a twelve and a half per cent to a five per cent grade.

—Fancy little chickens in the north end of town have had a mortal enemy recently. One by one they disappeared. Their going was a mystery, and much guessed at. A dozen or more of this breed disappeared from the Raber home. The fatality was a source of indignation, and finally Mr. Raber laid for the marauder. After two days of watching and waiting his vigil was rewarded. The shot gun did its deadly work, and after the smoke cleared away there was found, the mortal remains of somebody's black cat.

O. A. C. STUDENT ABROAD

Last Years Graduate has Position in Big Eastern Electrical Works.

Marion F. Bridges who graduated from OAC last year is now in the employ of the General Electric Company, Schenectady, N. Y. This establishment, which is the largest of the kind in the world, was founded in 1886 by Thomas Edison. It is commonly known as the Edison Electric company. About eleven thousand men are employed to make machinery that is sent to nearly every part of the globe. Even the ancient cities of Bombay and Calcutta are lighted by electricity which is generated with machinery manufactured by this company. Mr. Bridges is one of the 275 graduates representing sixty-four colleges and universities from eighteen different nations. He believes that the OAC graduates in this line of work stands about an equal chance with the eastern graduates. He states that while some of the older colleges may have more apparatus than some of the western colleges, yet after all, proficiency in principles must be the highest requirement for admission to the services of the great electric plants of the East.
