Neglected Colds Threaten Life.
 [From the Chicago Tribune.]
 "Don't trifle with a cold," is good advice for prudent men and women. It may be vital in the case of a child. Proper food, good ventilation, and dry, warm clothing are the proper safeguards against colds. If they are maintained through the changeable weather of autumn, winter and spring, the chances of a surprise from ordinary colds will be slight. But the ordinary light cold will become severe if neglected, and a well established ripe cold is to the germs of diphtheria what honey is to the bee. The greatest menace to child life at this season of the year is the neglected cold. Whether it is a child or adult, the cold slight or severe, the very best treatment that can be adopted is to give Chamberlain's Cough Remedy. It is safe and sure. The great popularity and immense sale of this preparation has been attained by its remarkable cures of this ailment. A cold never results in pneumonia when it is given. For sale by Graham & Wortham.

—The statement of local dealers is that only three cents a pound is offered by chittim buyers now. Last summer the price soared to five and a half and even to six cents a pound. Some local dealers still have small stocks at those figures, and unless quotations change will pocket a loss. The information however, is that medicine men are having to pay nine cents a pound when they buy a carload at a time from Eastern brokers, all of which makes it evident that it is Eastern middlemen that are making the profit just now. About ten cars of chittim were shipped out of Benton last season.

MANY SAW IT.

Beautiful Display of Northern Lights—Was Unusual in Character.

A brilliant display of Northern Lights was an incident of Tuesday night. The full effect was not manifested, because of clouds that partly obscured the heavens. The phenomenon first appeared about eight o'clock and was visible for an hour or two. Four long fan-shaped shot out of the north and stretched more than half way to the zenith, with varying play of swiftly changing lights of all colors and shades that made a rarely beautiful sight. Many of those who chanced to observe the scene called up neighbors by telephone and during the time there were many interested watchers. Many who saw it, recalled a time twenty or more years ago when a remarkable exhibition of the kind was observed two nights in succession, when the whole northern heavens were a blaze of brilliant lights extending to the zenith and sometime even beyond. As all know the phenomenon is electrical and on the occasion mentioned telegraph wires were so heavily charged with electricity that the telegraph business was in a measure interfered with.

What Else Could He Do.

It is part of a congressman's make-up to remember the faces and names of people whom he last met, but Mr. Leonidas F. Livingston, of Georgia, utterly lacks this faculty. He told the following story to a couple of his friends in his committee-room at the Capitol a few days ago.

"I was coming down in the elevator over on the Senate side yesterday, and a man whose face I knew as well as I know my own got in. He greeted me very warmly at once, asked after the House affairs, and was very gracious and friendly. But call his name I couldn't for the life of me. I put a sort of feeler to him, asking if he was going up to see the sights of the Senate. He gave a chilly laugh, as if he thought I was joking him. Finally I told him in an apologetic way, that I could not recall his name. He looked at me amazed for a second, and then said very quietly that his name was Fairbanks.

"Well, what did you do?" asked the listeners, laughingly.

"Do? Well, I just got out at the next floor for fear I would ask him if he had ever been in politics."
