

2016 HONDA HR-V

All-new sporty crossover vehicle offers coupe-like styling and great fuel economy

With bold and sporty coupe-like styling, SUV versatility, 35 mpg highway fuel economy rating, and Honda packaging magic, the all-new 2016 Honda HR-V is set to challenge the growing entry crossover market.

The all-new Honda HR-V crossover will deliver incredible value with a long list of standard features and technologies

including 17-inch alloy wheels, push-button electric parking brake, rearview camera with guidelines, Pandora radio and Bluetooth HandsFreeLink – all for a manufacturer's suggested retail price starting at just \$19,115.

Available in LX, EX and EX-L Navi trims, the 2016 HR-V is powered by a highly refined and efficient 1.8-liter 4-cylinder 16-valve DOHC i-VTEC engine producing a peak 141 horsepower and 127 lb.-ft. of torque. The engine is paired with one of two efficient and responsive Honda transmissions, a seamless and sporty continuously variable transmission (CVT), available on all models, or an engaging, short-shifting 6-speed manual transmission, available on LX and EX models with 2WD.

The HR-V also targets class-leading safety ratings and features Honda's next-generation Advanced Compatibility Engineering (ACE) body structure for enhanced frontal collision protection. The HR-V is designed to achieve top safety ratings: an NCAP five-star Overall Vehicle Score from the National Highway Traffic Safety

Administration (NHTSA) and a TOP SAFETY PICK rating from the Insurance Institute for Highway Safety (IIHS).

Developed on the new global platform, the HR-V utilizes a center-mounted fuel tank layout and reconfigurable 2nd-Row Magic Seat to deliver voluminous interior space along with a flexible cabin featuring multiple seating/cargo modes.

POWER

Power comes from a highly refined and responsive 1.8-liter SOHC 16-valve 4-cylinder engine with i-VTEC valvetrain, producing a peak 141 horsepower at 6,500 rpm and 127 lb.-ft. of torque at 4,300 rpm. The engine is mated to a sporty and fuel-efficient continuously variable transmission (CVT) with Honda "G-design" shift logic, or a slick-shifting 6-speed manual transmission (LX and EX FWD only).

SAFETY

Utilizing advanced safety technologies and design features, including Honda's next-generation ACE™ body structure, the HR-V is expected to achieve top-class collision safety performance ratings – a 5-Star

Overall Vehicle Score from the National Highway Traffic Safety Administration (NHTSA) and a TOP SAFETY PICK rating from the Insurance Institute for Highway Safety (IIHS), including a GOOD rating in the rigorous IIHS small-overlap frontal collision test.
