Documentaries explore freshwater life of salmon

MANZANITA — Fish enthusiasts, outdoorsmen and documentary lovers won't want to miss an up-close look at Oregon's signature anadromous fish species in two locally filmed and produced documentaries. The films will be screened by the Lower Nehalem Watershed Council on Thursday, April 14 at Pine Grove Community House, located at 225 Laneda Ave. The event is free and open to the public.

Doors open at 6:30 p.m. for refreshments, followed by an update from the Lower Nehalem Watershed Council at 7 p.m. and the screening at 7:20 p.m. Find more information on the LNWC speaker series at www.facebook.com/lnwcl

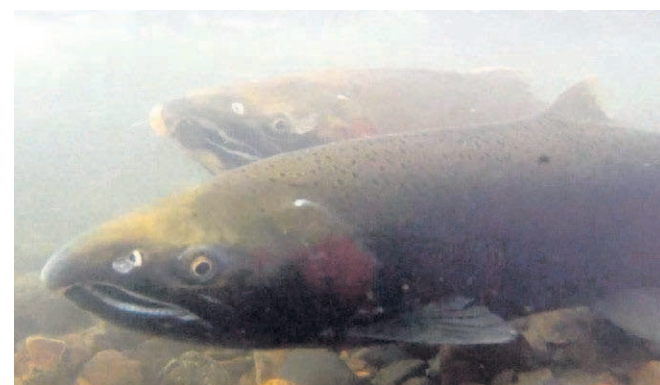

Derek Wiley from the Oregon Department of Fish and Wildlife will present a special screening of his films on the freshwater life of native salmon.

"Journey's End" is an 18-minute video capturing underwater behavior and spawning of wild chum salmon, Chinook salmon, coho salmon and Pacific lamprey in several rivers and creeks on the northern Oregon coast. "Salmonid Life Cycle Monitoring on the NF Nehalem River" (2015) is a documentary about ODFW's life cycle monitoring activ-

ities on the North Fork Nehalem River with a focus on the 2015 fall salmon trapping season.

Footage for both films was primarily captured with a GoPro camera, and editing was done with iMovie11. The two films showcase the journey of anadromous fish species during spawning season and offer a behind-the-scenes look at ODFW's Salmonid Life Cycle Monitoring Program.

Wiley is a research biologist with ODFW in Tillamook, supervising two field crews responsible for monitoring abundance of adult and juvenile salmonids in the NF

A still from "Journey's End" of paired up wild coho salmon.

Nehalem and EF Trask rivers for the Salmonid Life Cycle Monitoring project. He received a bachelor's degree in biology from Towson State University in Maryland and a master's degree in fisheries and wildlife from Frostburg State University in Maryland.

After graduate school, in

2004, Wiley moved to John Day to work as a biologist with ODFW on a steelhead research project. Two years later he moved to Tillamook to continue work with ODFW as a research biologist in his current position. Outside of work, he is an avid fly fisherman.
