Girl Scout Cookies

Strain- Indica Hybrid

(East Mountain Bud - Exclusive specialty strain Phenotype for Mr. Doobee's)

Strain Highlights- Girl Scout Cookies, or GSC, is an OG Kush and Durban Poison hybrid cross whose reputation grew too large to stay within the borders of its California homeland. With a sweet and earthy aroma, Girl Scout Cookies launches you to euphoria's top floor where full-body relaxation meets a time-bending cerebral space. A little goes a long way with this hybrid, whose THC heights have won Girl Scout Cookies numerous Cannabis Cup awards. Patients **needing a strong dose of relief**, however, may look to GSC for **severe pain, nausea, and appetite loss**.

THC: 24 to 27.4% CBD: 1.22%

Afghani Strain- Indica

(Quality Growers - Exclusive specialty Strain Phenotype for Mr. Doobee's)

Strain Highlights- Afghani is a heavy indica strain named after its geographic origin, where the earliest varieties of cannabis are believed to have grown. Breeders worldwide have come to treasure Afghani for its heavy resin production which creates a potent flower with a sweet, earthy aroma. Afghani delivers a deep, sedating relaxation and euphoria. Patients most commonly turn to this potent indica to **treat insomnia, pain, and stress issues**. But don't forget to have some snacks on hand because Afghani will definitely stimulate your appetite!

Author Douglas Deur to speak about coastal tribes April 21

CANNON BEACH — The Cannon Beach History Center & Museum will welcome author and professor Douglas Deur for a presentation on the history of coastal tribes at 7 p.m. Thursday, April 21. Deur will also share about his latest book, "Empires of the Turning Tides."

Published by the National Park Service, "Empires of the Turning Tides" illuminates the history of the many people who have called this region home and their relationship with the landscape, waters and natural resources that continue to set the Columbia-Pacific region apart. The book will be available for purchase, and proceeds will be donated to the museum.

Deur is a cultural geographer, known widely for his studies of Native American land and resource tradition, as well as the environmental and cultural his-

as a research professor in the department of anthropology at Portland State University and as an adjunct professor in the University of Victoria, British Columbia, school of environmental studies.

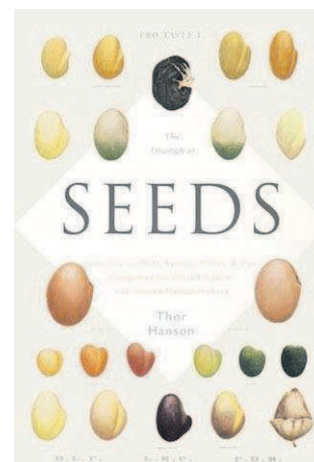

The presentation is free, and refreshments will be available. The Cannon Beach History Center & Museum is located at 1387 S. Spruce St. For more information, visit www.cbhistory.org or call 503-436-9301.

Trace the history, science of seeds April 21 Seaside library presents award-winning biologist, author

SEASIDE — Friends of the Seaside Library will host author and biologist Thor Hanson as he speaks about his book "The Triumph of Seeds" at 7 p.m. Thursday, April 21. The event will take place in the Community Room, and there will be book sales and signings provided by Beach Books.

From the tropical rainforest to the frozen Arctic tundra to the breakfast table, seeds are everywhere — ubiquitous yet easy to overlook. However, as award-winning conservation biologist Hanson reveals in "The Triumph of Seeds: How Grains, Nuts, Kernels, Pulses, and Pips Conquered the Plant Kingdom and Shaped Human History," seeds are more than just the vessels for future plants, they are crucial to human and animal life.

They can even be agents of death. Poisons such as ricin and strychnine are seed-derived, and grass seeds may have played

a role in spreading the Black Death across Europe in the Middle Ages.

Hanson explores the remarkable story of seeds by asking the question: Why are seeds so successful? Seed plants are dominant in today's world, yet for

much of evolutionary history, they did not exist.

Blending expert yet understandable explanations of science with humorous first-person reportage and historical anecdotes, Hanson traces the history and science of seeds, explaining how they nourish, unite, endure, defend and travel. Seeds are quite literally the stuff and staff of life, supporting diets, economies and civilizations around the globe.

Hanson is a conservation biologist, Guggenheim Fellow and Switzer Environmental Fellow. He is the author of the books "Feathers" and "The Impenetrable Forest." "The Triumph of Seeds" was the winner of the 2016 Pacific Northwest Booksellers Association award. He and his family live in Washington.

The Seaside Public Library is located at 1131 Broadway. For more information, call 503-738-6742.
