MOTHER'S DAY 2016 Animal Moms

Whoops! The octopus grabbed some of the words out of this article. Can you replace them?

An octopus mom is a busy mom. She lays from 50,000 _____ to as many as 200,000 eggs!

She carefully _____ her eggs and stitches them together in long _____. She then attaches them to the roof of a cave. This is her nursery.

It can take _____ for the eggs to hatch. The mother octopus stays with her eggs the entire time. She protects the eggs from _____. She waves her tentacles gently over the eggs. The moving water keeps them clean and _____ them with plenty of oxygen.

But watching the eggs means she can't go _____ to feed herself. Sadly, after the eggs hatch and she releases them into the ocean, she dies.

Standards Link: Life Science: Animals adapt in different ways in order to survive.

Mama Alligator

A mama alligator covers her eggs with old, rotting plants. As the plants rot, they give off heat which means mama doesn't have to sit on her eggs to keep them warm.

Help the alligator find her way back to the nest.

While she may not sit on her eggs to keep them warm, a mama alligator does stay close to the nest to protect the eggs from predators. Once her babies are born, she carries them around in her jaw for protection.

Extra! Extra!
Mom Adjectives

Look through today's newspaper for adjectives that describe each of the animal mothers on today's Kid Scoop page.

Standards Link: Language Arts: Grammar: Identify adjectives.

Donkey Devotion

Donkey mothers may be the most devoted of all. They will not let any other animal come between them and their babies. Even if a curious little kitten comes close, a donkey mom will chase it away.

Strange Reflection

Find the differences between the mother donkey and its foal and their reflection in the pond.

Standards Link: Visual Discrimination: Finding similarities and differences in common objects.

Kid Scoop® Puzzler

The mother Surinam toad cares for her eggs in one of the strangest ways. As the mother toad lays eggs, the male toad presses them one by one into the soft skin on the mother's back. After a while, each egg sinks into a little pocket that forms on the mother's back. Then a covering of skin grows over the pocket. The baby toads hatch and develop in these little pockets. A few weeks later, the mother rubs her back and the little toads swim free.

What did the mother Surinam toad say to her kids? Unscramble the answer:

"ETG FOF YM AKBC!"

FROM THE Kid Scoop® LESSON LIBRARY

"Mom, You're Fired!"

Imagine you could fire your mom. Look through the newspaper to find all of the different people and companies you would need to hire to replace your mother. How much would it cost for one week? One year?

Standards Link: Math: Estimation.

Why do kangaroos hate rainy days?

ANSWER: Because the kids have to play inside.

NEWSPAPER CARRIERS NEEDED

The Daily Astorian has several routes available in the Astoria area. Call 503-325-3211 for more information.
