 107 Order to a pest
 113 It can come in sheets
 114 A.T.M. printout: Abbr.
 116 Certain tow job, for short
 118 Shed tears
 121 Bygone record label
 122 Sauced
 123 Back muscle, briefly

Food Roots to expand Farm to School programs

TILLAMOOK — Food Roots has launched a crowd-funding campaign to raise the final funds needed to implement new Farm to School educational projects for Tillamook County students, including farm field trips, a School to Market entrepreneurship program, summer programs, family garden events, and more. Food Roots has already secured

nearly \$40,000 in funding from private and state grants and is now turning to the community to ask for help with the remaining \$6,000.

These projects will impact children throughout Tillamook County, with major projects in all three county school districts. Food Roots has new Farm to School activities slated to take place at Garibaldi

Grade School, East Elementary, and Nestucca Valley Elementary. In addition, the organization will continue to support and work at other schools, including Nehalem Elementary and Tillamook Junior High.

Specifically, Food Roots is raising funds to:

- Host a summer education program this year in conjunction with the Bay City Arts Center.
- Implement a School to Market project in which sixth grade students learn how to plan, grow, cultivate, harvest

and sell their own produce, using the school garden at East Elementary and the Food Roots FarmTable micro-enterprise stand at the Tillamook Farmers Market.

- Organize multiple farmer engagement events at Garibaldi Grade School, East Elementary and Nestucca Valley Elementary, in which students will connect with local farmers, either through field trips or school visits by farmers, complete with hands-on activities.
- Host multiple family garden engagement events,

in which students and their families come to school gardens throughout the county.

- Implement Oregon Agriculture Tasting Table events, setting up shop in schools to provide students with tastes of local produce.

Food Roots' new Farm to School Coordinator will take the lead on starting these programs. She will work with schools and current and future FoodCorps service members placed with Food Roots to ensure that kids throughout Tillamook County receive hands-on

garden and nutrition education. In partnership with FoodCorps and the Oregon Department of Agriculture, Food Roots' Farm to School program teaches over 700 children annually about gardening, farming, healthy eating and cooking, all while incorporating lessons in math, science, engineering and language.

To learn more and to help expand Farm to School education in Tillamook County, visit foodrootsnw.org/ campaign or call 503-815-2800.
