Clark Von Essen holds an albacore caught in July 2016 aboard Ilwaco-based tuna charter Shake N Bake.

N W word nerd

By RYAN HUME
FOR COAST WEEKEND

Albacore

[æl•bə•kɔʊr]

noun

1. Also known as the
longfin tuna because of its
unusually long pectoral
fins, the *Thunnus alalunga*
of the order Perciformes is
a commercially valuable
and ubiquitous species.

At home in warm or
tepid seas, these moder-
ately sized tunny travel
thousands of miles a year
in huge, migratory schools
and often find their way
into a can before a sand-
wich. Naturally, the alba-
core tuna lives an average
of twelve years, maturing
in five.

Albacore troll the Ore-
gon and Washington coast

in the summer months,
munching on anchovies
and sardines. The flesh of
fish is the lightest colored
known of any of the tuna
species. Albacore are also
often cut into sashimi
or steaks and are a good
source of Omega-3 fatty
oils

Origin:

Enters the Portuguese
around the mid-16th
century as “albacora.”
Believed by numerous
sources to have arrived at
the Portuguese from the
Arabic al-bakūrah, which
means “young camel.”

It is unclear how a
word for a lumpy land
mammal came to describe
a midsize tunny, but what
is clear is that al-bakūrah
has a secondary, feminine
definition and also meant
“virgin” or “maiden” in
Arabic at the time. Chalk
this up to another mystery
of the deep.

“Oregon Albacore are

fairly small (10-18lbs) and
are usually younger than
2 years old. Some smaller
boats will pull right up to
our front door and unload
their catch. Many custom-
ers will buy them right off
the scales - can't get any
fresher than that!”

—Northwest Wild Prod-
ucts website, http://northwestwildproducts.com/seafood/albacore_tuna

“North Pacific albacore
begin an expansive annual
migration in the spring and
early summer in waters off
Japan, continuing through-
out the late summer into
inshore waters off the U.S.
Pacific Coast, ending late
in the year (late fall and
winter) in the western Pa-
cific Ocean, according to
the National Oceanic and
Atmospheric Administra-
tion's Southwest Fisheries
Science Center.”

— Luke Whittaker, “Al-
bacore in abundance for
Ilwaco anglers,” The Daily
Astorian, July 28, 2016
