

# Seattle sets record for wettest October to June

Associated Press

SEATTLE — After three hours on the first day of June, the record was broken for the wettest October through June since record-keeping began in 1895.

The Seattle Times reported Thursday that even if it didn't rain at all

the rest of the month, the National Weather Service says the 47.24 inches of rain recorded in the past eight months is the most seen through a rainy season in recent history.

National Weather Service meteorologist Gary Schneider says the prior record for the period was set last year

with 47.23 inches.

Seattle also broke the October-through-April rainfall record.

The weather service says there have been 95 days with measurable rain at Seattle-Tacoma International Airport this year. That's three days short of the 1961 record through June 1.

## State Senate backs cities' use of red-light cameras to catch speeders

Associated Press

SALEM — The state Senate has approved a bill that would let cities use red-light cameras to also identify speeders.

The Register-Guard reported the Senate passed the bill 18-10 on Wednesday. The bill now heads to Gov. Kate Brown for her signature.

Portland, Salem, Medford and Madras are among the cities that use red-light cameras. Eugene signed onto a letter in support

of the bill, but doesn't currently use such cameras.

Beaverton officials led the effort to get the bill approved. The city found that in one year, 90,000 vehicles passed through their four red light cameras traveling at least 10 mph faster than the posted speed limit.

In a separate transportation-safety measure, The Oregonian reported the state Senate approved a bill that would allow Portland to lower residential street speed limits from 25 mph to 20 mph.
