

42362 Hwy 26 • Elsie, OR (Mile 18 on Hwy 26)
503.755.1818; 800-874-1810 • www.camp18restaurant.com
Hours: open daily - breakfast, lunch, dinner

The interior of the restaurant has a huge 85 foot Ridge Pole in the main room, the largest known in the U.S., it weighed 25 tons when cut and has 5600 board feet of lumber in it.

This building is Gordon Smith's dream. In the early 70's he began with a few rusty pieces of equipment, some of which were donated, others on loan and most of them purchased; which all led to the actual building of the Log Cabin.

Another spectacular feature of the building are the hand-carved main doors. They are cut from an old growth Fir log. Each door is 4 1/2 in, thick and weighs 500 pounds.

The two fireplaces are built with approximately 50 tons of rock found locally. The mantle of the fireplace in the main dining room is solid black walnut.

The restaurant is owned and operated by Gordon and Roberta Smith.
