BOGH ELECTRIC

Tony Bogh, a born and raised Astorian, started working in the electrical trade in June of 1988 for local contractors.

He started Bogh Electric in October of 2009. After a few years of working off of his dining room table, he became busy enough to hire employees. Tony gives a significant

amount of credit to his wife of 29 years, Jamie Bogh, who is not only the co-owner of their company, but is also very supportive of her husband's growing business.

To stay busy on the coast, Tony believes you need to be versatile and have nothing less than a team of all-stars, and speaks very highly of his employees. My team has the ability to perform all electrical services from low to high voltage, commercial and residential, and vintage to new build projects. "You're only as good as the people you surround yourself with, and I am very blessed to have the team I have here." Bogh Electric also installs LED lighting, and is a trade ally through Energy Trust of Oregon for lighting Retro-fits.

Tony's mother, Jean Bogh, is also very active at her son's business on a daily basis. She is Tony's biggest fan, and has always been very supportive of her son.

Tony feels honored that his phone rings daily, whether it be a new customer, or a referral received from a competitor. We strive to serve our customers with integrity and quality work. Tony believes his two most important assets are his customers, and taking care of the people that work with him. Everyone that works at Bogh Electric knows that to Tony, reputation is everything, and that he stands by his word.
