Kid Scoop® Puzzler

There could already be 150 million tons of plastic litter in the world's oceans. That's the same weight as 25 million of these large animals. If they stood in a line it would be 124,274 miles (200,000 km) long. It would go around the world five times.

To find out what kind of animal, unscramble the letters on the correct path.

Standards Link: Follow simple written directions.
