TACKLES CONTAMINATION AT THE CURB

Contamination at the curb - What's the big deal? Recycling works best when done properly. Lets all do our part to keep the recycle stream free of contamination to ensure an efficient recycling system. Check out this list of common contaminants and how to dispose of them appropriately.

whatbin.com
Recology's answer to what goes in what bin

Contaminant						
 Pet food bags	 Plastic Wrap & Film	 Plastic Clamshells	 Snack bags & wrappers	 Frozen Food Box	 Food Residue	 Paper Cups
Why not at the curb?						
Lined with plastic. Nearly impossible to separate the plastic from the paper fiber for recycling.	Clogs machinery at sorting facility; therefore, it needs to be collected separately.	No market for this low-grade plastic.	Made with a mixture of material such as plastic and aluminum, making it very difficult to recycle.	A plastic coating is sprayed onto the outside of box. Due to this coating the box will not break apart as required during recycling process.	Food residue inside containers leads to mold and germs. Always rinse or wipe out containers before placing in the cart.	Cups are coated with wax or plastic. Due to this coating it will not break apart as required during the recycling process.
Where should it go?						
Place in your trash cart. Consider buying in bulk to reduce the number of pet food bags.	Please take to a participating retail store.	Place in your trash cart. Consider less prepackaged foods to reduce plastic clamshell waste.	Place in your trash cart. Consider using reusable snack bags.	Place in your trash cart. Consider buying in bulk to reduce the number of frozen food boxes.	Rinse or wipe to remove food residue before recycling.	Place in your trash cart. Consider using a reusable bottle or mug.
