

# Food Chain

## THE CIRCLE OF LIFE

A food chain links plants and animals to each other for survival. For example, a plant gets eaten by a small animal. That animal is also food for another, larger animal. Ultimately, when plants and animals die, decomposers cause them to turn back into soil that will grow more plants and the circle of life continues. The diagram at right illustrates a basic food chain.

### Complete the Food Chains

Below are three unfinished food chains. Complete each chain by drawing, naming or pasting a picture of one of the choices of plants or animals who lives in that plant community. Think about which animals are herbivores, omnivores and carnivores.

### Evergreen Forest Community

The forest community has many different kinds of trees. Ferns and mosses can also be found.

### Creekside Community

The area along the banks of a creek is mostly moist and shady.

### Grassland Community

This can be a dry and hot area. Mostly low, dense bushes and a few wildflowers can be found there.

## Food Chain Words

**PRODUCERS:**  
Plants that produce their own food from sun, water, air and soil.

**CONSUMERS:**  
Animals that eat other plants and animals.

**DECOMPOSERS:**  
This group includes fungi, bacteria and worms that eat decaying plants and animals.

### Community Connections

Look through the newspaper for five or more people or places that are connected to your life. (Example: A grocery store where your family shops. What other connections can you find?)

**Standards Link:** Research: Use the newspaper to locate information.

### Kid Scoop Puzzler

Draw the thing that should come next to continue the pattern in each row.

#### Advertising Math

Find an ad in today's paper that is especially interesting to you. Using the subject of the ad, write a two-step word problem. Then, have a classmate try to solve your problem.

**Standards Link:** Language Arts: Understanding meanings from context clues.
