

NURSES & MEDICAL PERSONNEL

REHAB SERVICES PROVIDENCE SEASIDE HOSPITAL/GEARHART CLINIC

Providence Seaside Hospital

Our whole department served patients throughout the pandemic in both the inpatient and outpatient setting, while maintaining a patient experience average of greater than 90% for overall rating of care. We treated and supported our patient population, as we worked through the many process changes and offered support to other departments when staffing was at its greatest need. We worked diligently to maintain the highest standard of safety. We treated patients with all diagnosis and conditions and continued to greet them with a smile.
