UNDERWOOD

E. M. Cummins, G. C. Corlie, A. J. Haynes, Geo. Sandell, Wm. Underwood and W. F. Cash were in Stevenson Monday on business connected with roads in this district. As a result of a conference with the county commissioners the Freeman road will soon be opened to travel, and several rulings were made that will be of great benefit and assistance to the people in securing new roads in the future.

Geo. Darting has been appointed road supervisor for the ensuing year, the only other candidate withdrawing in favor of Mr. Darting as soon as he was assured that he would serve if appointed. Mr. Darting has the confidence of all the people, and as there should be quite an increase in the amount of money available this year, we hope to soon see a decided improvement in the condition of our roads.

E. M. Cummins has been appointed justice of the peace and Geo. Sandell constable.

County Engineer Linn and Mr.

Page of the Wind River Lumber Company, were here Friday looking after the repairing of the bridge over the White Salmon, which was damaged by the breaking of a boom during the recent high water.

Mrs. and Miss Weber, mother and sister of Mrs. Nels Munch, are making her a visit.

Owing to the ice running in the river the Underwood ferry has taken a vacation for a few days and Capt. Olsen is in Astoria.

P. I. Packard and wife have returned from a two weeks' visit in Portland.

The railroad situation is likely to take on almost any kind of a turn in the near future. The survey up the White Salmon is undoubtedly only a link in a larger proposition, but whether it is backed by the North Bank, the Northern Pacific, the Milwaukee, or the North Coast is hard to say at present, for any or all of these lines want to get a short cut through from the Yakima country and the route down the White Salmon, connecting with the North Bank at Underwood, is in all proba-

bility the best that can be had. In addition to the bunch of surveyors who have been on the ground since last summer, another large crew was landed at Bingen last Thursday, with some 200 pieces of baggage. It is rumored that this crew is to begin work at Husum, running northeast towards the Glenwood country, just beyond which place all of the roads mentioned have been working on surveys that are headed this way from the Yakima country. At any rate there is sure to be something doing in this neck of the woods before long.

The flour mill proposition has been delayed in getting arrangements made with the railroad company for a siding, but assurance is now given that this matter will be attended to promptly and we hope to see work begun soon on the mill.

W. A. Wendorf and Herman Beuche had phones installed last week. This makes 30 phones on the Underwood Telephone Co. system and they are planning to install a "Central" in the near future.

MOSIER

Mrs. Anna Godbersen returned to her school at Monmouth after spending her Christmas vacation with her mother.

Mr. and Mrs. Oss returned home Monday, having spent the holidays with friends in Portland.

Amos Root was a business visitor at The Dalles Wednesday.

The property belonging to the M. J. Mosier heirs was sold last week to W. H. Wilson, of The Dalles, consideration \$8000. Dr. Robinson and wife retained the house and a small tract of land for their home.

Mrs. Lou Graham and Miss Nora Hunter spent several days in Hood River last week, installing the officers of the Relekah lodge there and at Odell. They report a most delightful trip.

Mrs. Belle Booth returned from Portland Friday, where she had spent several days visiting friends.

Mrs. John Evans came home Friday from Hood River where she has been the past two weeks with her daughter, Mrs. Macey.

The house belonging to Mrs. E. J. Bailey was totally destroyed by fire Wednesday about 2 p. m. Everything up stairs burned but most all on the ground floor was saved. The fire was started from a defective flue. The family has moved into the Burlingame place for the present. Mrs. Bailey is a widow with a large family and the loss comes pretty hard on her as we learn there was no insurance. The people of Mosier collected a goodly sum for her benefit.

The snow and cold weather seem to have come to spend the winter with us. The cold is knocking the town water supply out of commission, half the pipes in town being frozen.

Mr. Wilcox, father of Dick Wilcox, who is making a tour of the west, stopped off for a few days to see his son. He left Saturday for the east and expects to return in the near future and locate in Tacoma.

Big Business at Stockyards
Receipts at the Portland Union stockyards since September 15th, at which time business was commenced have been 23,025 cattle, 32,016 sheep, 34,328 hogs and 500 horses. The ready support given by the live stock raiser and shipper of the Northwest to the market established at Portland is an evidence of the utility and need of such an institution as the Portland Union Stockyards. Established along open and competitive lines, this healthy young market will continue to grow until it will take its place among the big live stock centers of the United States.
