

Water Works on the Farm

Yes, that's just what we mean—real water works; running water in the kitchen, the bathroom, the laundry, the barn—in fact, all over the place. And it's all done by that tank you see in the lower left hand corner of this picture—the Leader System. It's vastly different from the old-fashioned elevated tank which worked by gravity. For the Leader Water Supply System is operated by compressed air—reliable, safe and clean. Your windmill pumps water into the tank (which is already full of air). The air, being elastic, is compressed into upper part of the tank, and forces the water out through the pipes.

This gives you a pressure, so that a powerful stream of water is on tap at every faucet, no matter where it is located. And this means absolute fire-protection, for the pressure is always on and always ready. Now, the old style gravity tanks were either put in the attic or situated on a high tower out of doors.

In the former case, their weight when full, cracked the plastering; or they overflowed or leaked, flooding the rooms below. In the case of the outside tanks, the water often froze solid in winter, necessitating expensive plumbing bills; or it became hot and stagnant during the summer and unfit for use. The

Leader Water Supply System

avoids all this, because the air-tight tank is either in the basement or buried underground below the frost line. Every outlet is complete, with full directions, and is easily installed. The Leader System needs no repairs, is suited to small buildings or large, and is moderate in price.

Let us send you our free booklet, "How I Solved the Water Supply Problem," the story of a man who successfully equipped his country home with modern water works. Write for it today, before you forget

HOOD RIVER, OREGON

SAY, MR. LAND-BUYER,

Did you know that "Underwood" and "Hood River" are in the same Township and Range, and that the two depots are only *one and one-fourth miles apart*? Stop and think what this means--Soil, Climate and natural conditions absolutely identical.

Our side of the river is "new" so far as development is concerned. We need more people. We need *you*, especially if you are willing to take the raw land and improve it,—so if you find that you haven't the price for an orchard in Hood River, come over and give us a chance to show you what we have. You will find that a dollar will go very much further toward buying an acre of land here, than it will in any of our neighboring districts. Write or phone me and I will see that you are met at the depot or dock.

STRAWBERRY GROWERS

Of Hood River Valley

IN A FEW WEEKS, almost before you know it, the **BERRY SEASON** will be at hand, and from all reports the crop will be a large one.

The Apple Growers Union will ship berries this year, and with its splendid storage equipment and shipping facilities will be in position to help you get the best possible returns for your crop.

We want your business, and in favoring us you will also help yourselves by building up an institution that is owned and controlled exclusively by growers of Hood River Fruit.
