**Now Comes
The Aerial
Liner.**

COUNT ZEPPELIN has made good his remarkable prophecy, and we have an aerial passenger service, regular trips now being made in his huge new dirigible balloon, the Deutschland, between Friedrichshafen and Dusseldorf, Germany. On the first voyage that marked a new epoch in aerial navigation eleven passengers made the trip of 300 miles and felt as safe as if riding in a railroad train or steamer.

Not a hitch occurred to mar the voyage, and the average speed maintained was about thirty-three miles an hour. The 124 miles between Friedrichshafen and Stuttgart were traversed at an average rate of forty-one miles an hour. The best speed for a single hour was forty-three and one-half miles. The 300 miles was covered in almost exactly nine hours.

The route lay over Stuttgart, Mannheim and Cologne, and at each of these places monster crowds, attracted by advance notices, had gathered to witness the flight. They gave vent to their enthusiasm with the ringing of bells, the firing of guns, the tooting of whistles and by yells from thousands of leather-junged throats. Each of the cities was reached on almost the exact hour named in the schedule.

The passengers on board spent the time in looting about the big, luxuriously appointed stateroom and feasting their eyes on the scenery which flew beneath. The craft was kept at an average height of about 300 feet, and the view was said to have been magnificent. Count Zeppelin himself was at the helm, and his guests consisted of members of the Hamburg-American Steamship line, the German Airship Stock company and a number of close friends.

The dimensions of the Deutschland are: Extreme length, 485 feet; greatest

COUNT ZEPPELIN AND HIS AIRSHIP.

breadth, 46 feet; balloon capacity, 671,000 cubic feet of hydrogen gas; three motors together have 330 horsepower; approximate cost, \$200,000.

The hugeness of the Deutschland may be understood not only by its great length and breadth, but by the fact that its lifting capacity is 44,000 pounds. The crew, passengers and express take only 11,000 pounds of this power. The promoters of the new aerial service plan to make the regular trips between Friedrichshafen and Dusseldorf, a distance of 300 miles, but the big airship, it is said, can do a 700 mile continuous voyage.

In speaking of the trial voyage one of the passengers said: "It was a wonderful trip. The ship was as steady as a rock. The passenger cabin is delightfully comfortable. There a smart waiter served iced champagne at noon and tea at 5 in the morning. We had an exciting moment coming over the Swabian hills when we were compelled to ascend sharply by lifting the rudder. The trip down the Rhine was perfectly exquisite. One soon gets used to the noise of the motor, and traveling in the cabin, with its carpeted floor and freedom from vibration, is finer than any steamship trip I ever took."

Count Ferdinand Zeppelin, who operated the dirigible on its first successful passenger carrying trip, has had a very dramatic career. He was born near Friedrichshafen, from which point he began his journey, in 1838. He began his career in the German army before he was twenty-three and two years later was detailed for observation duty with the Union army during the American civil war.

The count interested himself in aerial navigation very early, and his first balloon flight was in a captive balloon, in which he ascended from the Union lines while connected with the Army of the Potomac. He served on the staff of General Carl Schurz and at the battle of Fredericksburg effected his escape from capture by a brilliant feat of horsemanship, making a charge through a line of bayonets with which he had been encircled.

He returned to Germany and participated in the Austrian war of 1866 and the Franco-Prussian war of 1870. He was promoted to the rank of general in 1880 and then retired to devote himself to aeronautics, which had become a passion with him. He spent his entire fortune of a half million dollars in his experiments and but for the assistance of the German emperor and the king of Wurttemberg must have failed for want of means. He has built one airship after another and on one occasion traveled 200 miles from his home to Frankfurt and later succeeded in carrying twelve passengers for a short distance through the air and a year ago, with a crew of twenty-six men, was able to raise his machine to a height of 6,000 feet.

UNDERWOOD
Rev. H. C. Lowden and family spent the Fourth in Stevenson.

E. C. Goddard and family are spending a month at the ranch here.

Dr. Geo. S. Whiteside recently visited at "Skookum" ranch of which he is part owner.

H. Amos and several friends have been spending a few days at their place on the river west of here.

The blackberry season is on full blast now, and they are exceptionally large and plentiful this year.

The people who bought the Stipp sawmill at Chenoweth unloaded a large donkey engine here last week which they took over there to use in getting the logs down to the mill.

The Apple Growers' Union began work on the grading for their warehouse last week. This will be completed in a few days and work will be begun on the building which is to be 32x48, a story and a half.

Frank D. Morrison and daughter May of Yankton, S. D., are spending a few days with W. F. Cash. Mr. Morrison lately purchased some fruit land in the Hamlin neighborhood, and is much interested in the future of the country.

Chamberlain's Stomach and Liver Tablets gently stimulate the liver and bowels to expel poisonous matter, cleanse the system, cure constipation and sick headache. Sold by all dealers.

M. S. Smith, our merchant, has had his store elevated to the level of the railroad track and will have it completely remodeled. The rapid increase in the business at this point has made it absolutely necessary that he have more room.

Soreness of the muscles, whether induced by violent exercise or injury, is quickly relieved by the free application of Chamberlain's Liniment. This liniment is equally valuable for muscular rheumatism and always affords quick relief. Sold by all dealers.

R. P. Ballard and wife, Dr. Geary and wife, Roy Wilson and Mr. Quigley, all of Seattle, and who are interested in a large orchard tract which they purchased from Emile Walthers last year, spent a few days here recently. Mr. Ballard's mother accompanied the party and is so in love with the country that she will build a summer home here.

The world's most successful medicine for bowel complaints is Chamberlain's Colic, Cholera and Diarrhoea Remedy. It has relieved more pain and suffering and saved more lives than any other medicine in use. Invaluable for children and adults. Sold by all dealers.

At a meeting held at the Underwood school house June 25th, to discuss the matter of bonding the county for road purposes it developed that the feeling was against the bond proposition, but a strong feeling in favor of more and better roads and the county commissioners will be asked to levy such special tax on this district as will give it \$4000 for road purposes next year, to be expended under the direction of a committee of three men from this district.

When the stomach fails to perform its functions, the bowels become deranged, the liver and kidneys congested causing numerous diseases. The stomach and liver must be restored to a healthy condition and Chamberlain's Stomach and Liver Tablets can be depended upon to do it. Easy to take and most effective. For sale by all dealers.

The railroad company have at last got to the point of actually building the siding here that they have promised us for the last three years, and before they had it constructed far enough to clear the main track it was in use. They expect to cut off the rocky ridge south of the track and move the main line over so that the siding can be laid about where the main track is at present. With facilities here for handling carload lots we expect the business to show a great increase in the next few months, for landing it at Underwood makes a big saving in the freight haul on all the stuff that goes up the valley.

There is more Catarrh in this section of the country than all other diseases together, and until the last few years it was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. Cheney & Co., Toledo, Ohio. Take Hall's family pills for constipation.

Water Works on the Farm

Yes, that's just what we mean—real water works: running water in the kitchen, the bathroom, the laundry, the barn—in fact, all over the place. And it's all done by that tank you see in the lower left hand corner of this picture—the Leader System. It's vastly different from the old-fashioned elevated tank which worked by gravity. For the Leader Water Supply System is operated by compressed air—reliable, safe and clean. Your windmill pumps water into the tank (which is already full of air). The air, being elastic, is compressed into upper part of the tank, and forces the water out through the pipes.

This gives you a pressure, so that a powerful stream of water is on tap at every faucet, no matter where it is located. And this means absolute fire-protection, for the pressure is always on and always ready.

Now, the old style gravity tanks were either put in the attic or situated on a high tower out of doors. In the former case, their weight when full, cracked the plastering; or they overflowed or leaked, flooding the rooms below. In the case of the outside tanks, the water often froze solid in winter, necessitating expensive plumbing bills; or it became hot and stagnant during the summer and unfit for use. The

Leader Water Supply System

avoids all this, because the air-tight tank is either in the basement or buried underground below the frost line. Every outfit is complete, with full directions and is easily installed. The Leader System needs no repairs, is suited to small buildings or large, and is moderate in price. Let us send you our free booklet, "How I Solved the Water Supply Problem," the story of a man who successfully equipped his country home with modern water works. Write for it today, before you forget.
