COUNTY REPUBLICANS RECOMMEND TICKET

(Continued from Page 1)

ity and checked improper methods on the part of certain corporations, has upheld and furthered the greatest improvement of the age in the work in the Isthmus of Panama, and in increased facility of navigation of our inland waterways and development of our harbors; and has worked for efficiency and honesty, also looking toward the decrease of the burden of taxation. We heartily commend the administration of President Taft on account of the postal savings bank, a measure which the country has long desired and which we believe will prove a great blessing.

We also express our satisfaction with the services of our congressman Hon. W. R. Ellis, who has endeavored to protect the interests of his constituents and to obtain for them the granting of advantages to which they are entitled, when those who were sent to represent this state in the senate have been careless and neglectful of the rights of its people. We likewise endorsed and heartily approve of the work of our representative, Hon. J. L. Carter, in the last session of the Oregon legislature.

We believe in a representative form of government; we believe that such a government, in its best and highest form, can only be reached when it is possible for those who believe in and desire such a government to meet together for the purpose of discussing public matters and affairs, principles of legislation and of governmental action; to choose from among their number those whom they deem to be fit representatives of the principles of the party, thereby preserving to us and to our posterity the political rights and liberties secured to us by the patriots of those notable assemblies and conventions which gave to us and the world the Declaration of Independence and the federal constitution.

Non-partisan government, so-called as we have seen it, has been effective principally in favoring the schemes of those incompetent ones who will trick and plot by any means to secure to themselves position in public office, without regard for, and in no way representing, the choice of the people.

We are in favor of so amending the constitution of the state of Oregon as to permit counties to issue long term bonds to pay the expense of the immediate construction of modern and permanent roads and highways.

The voters of this state have sufficient cause to carefully scrutinize the uses to which the initiative and referendum has been prostituted. The purpose of the law was to enable the people to cure defects in legislative enactments, or to secure, between sessions of the law-making body, immediate relief, when the public welfare demanded; but the law has been used for selfish interests so that we have now upon our statute books some laws which are ill-considered, and some which are contradictory or conflicting. We believe there is grave danger in these measures unless some limitation be placed upon their use.

Resolved, that we heartily endorse the direct primary elections law, but deny that this law was ever intended to take away our constitutional right to assemble in a peaceable manner to consult for our common good.

Resolved, that we appeal to all Republicans, to all who honor the achievements of the Republican party in behalf of human liberty, progress and the widest national prosperity and influence, to join with us in supporting these principles and, so far as they may be found worthy, the candidates recommended by this assembly.

Respectfully submitted,
A. A. JAYNE,
NEWTON CLARK,
J. G. TATE,
C. DETHMAN,
J. L. HERSHNER.

A motion to take a recess to allow the various precincts to select delegates to the state assembly was carried and when called to order the following were elected. A. M. Kelly, G. W. Dimmick, A. R. Graham, W. L. Carnes, C. Dethman, J. L. Carter, S. G. Campbell, J. G. Tate, C. D. Thompson, A. A. Jayne, C. T. Early, D. McDonald, T. J. Cuning, George Hascall, N. C. Evans. The delegates to the state assembly were authorized to attend the congressional district and judicial assemblies.

In order to give Falls precinct a better representation in the assembly a motion was unanimously carried to give J. P. Lucas a seat in the Falls precinct delegation.

Nominations for county officers were then put in motion. The first office taken up was that of county judge. L. N. Blowers was placed in nomination by S. G. Campbell, Newton Clark was nominated by Rev. J. G. Tate and G. R. Castner by C. D. Thompson. Frank Chandler and S. G. Campbell were appointed tellers. Blowers received 14 votes, Clark 38 and Castner 14 and on mo-

tion of Mr. Castner Mr. Clark's nomination was declared unanimous.

For the office of commissioner there were four candidates nominated. G. A. McCurdy's nomination was put before the assembly by J. H. Shoemaker, H. S. Galligan named by C. Dethman, O. H. Rhodes by Hans Lage and A. M. Kelly by G. W. Dimmick. It was decided to let the commissioners who were nominated decide who should run for the long and short terms.

The vote was as follows: McCurdy 55, Galligan 38, Rhodes 10, Kelly 24. Mr. Galligan and Mr. McCurdy being nominated the former asked Mr. McCurdy to become the candidate for the four year term. The latter stated he would consider the matter as he might want to retire after two years' service.

For office of sheriff G. W. Dimmick was nominated by E. C. Miller, Frank Chandler by R. D. Smith and G. R. Castner by W. H. Walton. The ballot showed that Castner received 33 votes, Dimmick 23 and Chandler 8. Mr. Castner was declared elected, having received a majority of all the votes cast.

The candidates for county clerk were F. H. Isenberg and J. P. Lucas, the former received 32 votes and the latter 30, and Mr. Isenberg's election was made unanimous at the suggestion of Mr. Lucas.

Mr. Lucas was then declared the unanimous choice of the assembly for assessor and the secretary instructed to cast a ballot declaring him elected.

C. D. Thompson was also declared the nominee of the assembly for county school superintendent and J. M. Schmeitzer for county treasurer. C. M. Huribert was unanimously elected as the nominee for county surveyor. Dr. F. C. Brosius was made the unanimous choice for coroner, A. C. Buck for justice of the peace and E. S. Olinger for constable.

The precinct committeemen were then named as follows: P. S. Davidson, west; S. G. Campbell, east; G. R. Castner, center; Roy D. Smith, south; A. M. Kelley, Baldwin; W. L. Carnes, Odell; A. W. Meyers, Falls.

A number of enthusiastic speeches followed, endorsing the county nominees and the assembly, among those making addresses were E. L. Smith, T. J. Cuning, J. G. Tate and J. L. Hershner. The candidates were also called upon and pledged themselves to administer the affairs of their several offices to the best of their ability in case they were elected.

Wingless Chickens

Chicken wings will disappear when the new wingless chickens raised by W. A. Bertram of Illinois become common. He has found that wings decrease the value of chickens in the cities and towns by making confinement in yards more difficult. He conceived the idea by crossing common breeds with the Wyandottes and Barred Rocks, having wings smaller in proportion to their weight than of other chickens. After several seasons he has produced a funny looking thing which has only a few pin feathers where nature meant wings to be and which can not jump a fence higher than two feet. It will be easier to fatten chickens which do not reduce their weight by the exertion of flying. Putting more flesh on the drumsticks and wishbones will compensate for the disappearance of the wings.—Exchange.

Wheat Harvest On at Dufur

Harvesting is now on in full blast in this community, there being but few of the farmers that have not commenced cutting. The yield this year is the largest for many years and with the large number of acres that were seeded both to fall and spring grain the quantity that will be marketed here this fall will be greatly in excess of any former year.

It seems that the weather conditions the past spring have been ideal for the growth and development of the different grains and the present "bumper" crop is the result. No estimate has yet been made as to the probable yield from this section but all claim it will be one of the largest in history.—Dufur dispatch.

White Estimates 21,000 Cars

Some time ago W. N. White made the statement that the West would produce 18,500 cars of apples this season. Many have questioned this statement and when Mr. White was seen regarding it, he said that next week he would give the News a detailed statement of the various counties in the Western states which will produce apples and he now estimates that instead of 18,500 carloads, there will be 21,500 from a few sections in the middle West including Illinois, Missouri and parts of Kansas. The western apple crop is bountiful, Canada and Nova Scotia also have large crops and the fruit is growing nicely in New York.—Produce News.

The world's most successful medicine for bowel complaints is Chamberlain's Colic, Cholera and Diarrhoea Remedy. It has relieved more pain and suffering and saved more lives than any other medicine in use. Invaluable for children and adults. Sold by all dealers.

Water Works on the Farm

Yes, that's just what we mean—real water works; running water in the kitchen, the bathroom, the laundry, the barn—in fact, all over the place. And it's all done by that tank you see in the lower left hand corner of this picture—the Leader System. It's vastly different from the old-fashioned elevated tank which worked by gravity. For the Leader Water Supply System is operated by compressed air—reliable, safe and clean. Your windmill pumps water into the tank (which is already full of air). The air, being elastic, is compressed into upper part of the tank, and forces the water out through the pipes.

This gives you a pressure, so that a powerful stream of water is on tap at every faucet, no matter where it is located. And this means absolute fire-protection, for the pressure is always on and always ready.

Now, the old style gravity tanks were either put in the attic or situated on a high tower out of doors. In the former case, their weight when full, cracked the plastering; or they overflowed or leaked, flooding the rooms below. In the case of the outside tanks, the water often froze solid in winter, necessitating expensive plumbing bills; or it became hot and stagnant during the summer and unfit for use. The

Leader Water Supply System

avoids all this, because the air-tight tank is either in the basement or buried underground below the frost line. Every outfit is complete, with full directions, and is easily installed. The Leader System needs no repairs, is suited to small buildings or large, and is moderate in price.

Let us send you our free booklet, "How I Solved the Water Supply Problem," the story of a man who successfully equipped his country home with modern water works. Write for it today, before you forget.
