**MOSIER**  
J. H. Reeves spent Sunday on his apple ranch in Hood River valley.  
Rev. Spaulding of Hood River preached Sunday in the Baptist church.  
Mrs. McClure of La Grande is here visiting her cousins, Tom and Will McClure.  
Miss Lurline Fisher is hello girl in the telephone office mornings and evenings.  
Mr. and Mrs. J. N. Mosier left Thursday for Astoria to attend the Elks' meetings.  
Dr. Macrum is spending a few days on his ranch to recuperate after a two weeks' illness.  
Mr. and Mrs. C. A. Frey returned Saturday from a week's camping trip up Hood river.  
T. G. Husbands came up from Hood River Sunday to visit with his brother, W. A. Husbands.

Mrs. Alex Stewart, who was taken to the Cottage hospital a week ago, is reported as much improved.  
Mrs. D. Robinson returned from The Dalles Thursday accompanied by her niece, Miss Gladys Phillips.  
Prune packing began Tuesday morning and will be rushed through as soon as the prunes can be brought in.  
Geo. Young, Roy Edmisten and C. B. Chlek left Saturday for Lyle, Wash., where they have a job of hauling lumber.  
Ed Dunsmore, C. J. Littlefield and others who went to Cascade Locks on a hunting trip returned Thursday with the game.  
Miss Irene Phillips and brother Oscar were called to Portland the latter part of the week on account of the serious illness of their mother. Word was received Friday that she had died.

**WILLow FLAT**  
B. E. Smallwood is enjoying a visit from his sister and nephew.  
Mrs. Mildred McIntosh is the guest of her brother, O. F. Bresse.  
We regret to hear of the illness of several members of Mr. Dunaway's family.  
The Priscilla Club hold their next regular meeting Thursday afternoon with Mrs. O. H. Hill.  
Miss Lambert of Salem has been engaged to teach the Dukes Valley school for the ensuing year.  
John Hale, Carl Abraham, Miss Eda Friday and Miss Nina Redfield spent Sunday at the Punch Bowl.  
Mrs. B. H. Lage, Miss Grace Turney and Miss Joy Mason were guests at Mrs. H. E. Redfield's during the week.  
Mr. and Mrs. Paul Hansen and daughters have returned from a pleasant week's camping at Trout Lake.  
Mrs. O. H. Hill entertained a children's party Saturday in honor of her little nieces, Misses Ruth and Adah Munger.  
Miss Margaret Massee was the hostess Tuesday at a birthday party in honor of her sixth anniversary. Among the little guests were Ruth and Adah Munger, Nellie and Esther Hagen, Mae Smallwood and Helen Redfield.  
An ice cream social under the auspices of the Priscilla club was held at the home of C. A. Snyder Saturday evening. The lawn was beautifully illuminated with Japanese lanterns and presented a striking appearance from the surrounding valley. Guests were present from Pine Grove, Newtown and Barrett and all spent a delightful evening.

J Adrian Epping to FR Brydle 80 acres in Dukes Valley  
Chas A Meyers to J E Reynolds lots 23 and 24 block 3 Idlewild addition  
Peter J Lenz to Guy M Talmage 10 acres in Odell  
**Canned Digger Squirrels**  
Ross Winans, while on the way to town Saturday saw a curious incident. A digger squirrel, which was surprised by his team, in seeking a place of concealment stuck its head into an oyster can that was lying in the road. Unable to extricate itself Mr. Winans captured the animal and brought it to town. He thinks the incident might serve as a tip to orchardists who want to know how to rid themselves of digger squirrels. All that will be necessary, according to him, will be secure a wagon load of empty oyster cans, strew them in the orchard and shoot off a gun. Result, gather up the oyster cans plus the diggers.

**HELPED BY HUMIDITY.**

**Many Materials and Products Which Require Moist Air.**  
There are many materials, operations and products which require special atmospheric conditions for advantageous or profitable maintenance. Principal among such operations is the manufacture of textiles, perhaps the largest single industry carried on in factories. In the favored climate of the Lancashire district of England the natural climate affords working conditions equalled in America only on occasional days in certain localities. Even in England, however, there are many days in which the atmosphere is too dry for the best work.  
Since textile fibers are increased in strength and elasticity by high humidity and moderately high temperature, breakages are less frequent under proper conditions, and the output is increased. But even before the fiber reaches the manufacturing plant atmospheric humidity plays an important part. Cotton loses weight as it dries out, but, more than that, the fibers bristle and appear shorter and of lower grade than when slightly moistened. Leather, feathers and many other porous substances lose a considerable percentage of weight in drying out, so that the maintenance of average and uniform humidity in the storage rooms has a direct advantage to the owner in maintaining the value of his goods as they lie in the warehouse. Cigars and tobacco lose flavor in dry air and regain it to some extent, after loss, by storage in proper humidified rooms. Wooden furniture and musical instruments are sometimes cracked or the finish injured by the dry air of steam heated rooms. All these and other similar goods are advantageously worked or stored in rooms in which the atmospheric humidity is artificially controlled and kept at the most desirable point.—Engineering.

**A PIG'S SQUEAL.**

**It Played a Momentous Part in American History.**  
The war between this country and England in 1812 was caused by one vote, and, stranger still, the small margin came from a pig getting its head stuck in a rail fence. It was a Rhode Island fence at that, but built much like a Virginia worm fence.  
They were having an election of members of the legislature in Rhode Island. One Federalist put off going to the election and left himself just time enough to get there before the polls closed. Just as he got on his horse and started for town he heard a pig squeal. He looked around and saw that the pig had its head jammed into that old rail fence, and anybody who knows anything about hogs knows that the hogs would have eaten that pig up if it hadn't been rescued. The farmer stopped long enough to liberate the pig, and when he got to the polls they were closed. He was too late.  
The result was that a Democratic member of the legislature was elected from that district by one vote, and he would not have been elected if that Federalist had got there on time. In the legislature a Democratic United States senator was elected by one vote, and that Democratic legislator who had been elected by one vote voted for him.  
In the United States senate they voted for the war of 1812 by one vote, and that Rhode Island Democratic senator who had been elected because that pig was caught in the fence voted for the war of 1812.—Popular Magazine.

**Not a Waxwork.**  
The opening of the courts in an asize town in England is always a great day for the residents. The procession to the church, where the judge says his prayers and listens to a homily, the march to the court, with the attendant javelin men and the braying of trumpets—the men in wigs and gowns—fill the rustic mind with the sense of awe and the majesty of justice. It is related in Mr. Thomas Edward Crispe's book, "Reminiscences of a K. C.," that a farmer once took his son into the crown court.  
On the bench was the Baron Cleasby, gorgeous in scarlet and ermine, statuesque and motionless. The yokel gazed with open mouth at the resplendent figure on the raised dais. Suddenly the baron moved his hand from right to left and left to right.  
"Why, feyther," said the boy, "it's alive!"

**A Friend In Need.**  
Algie—I say, Fred, you're—aw—a friend of mine, aren't you?  
Fred—Sure.  
Algie—Then be a good fellow and—aw—help me out. I'd like to have that pretty cousin of yours learn all about my—aw—good potats, docher know.  
Fred—I am helping you, old chap. I argued with her for two hours yesterday trying to convince her that you weren't as big a fool as you look.—Chicago News.

**Laughter.**  
Without laughter the human race would have wept itself to death or exterminated itself long ago. Pathos is beautiful; tragedy is absorbing. But both pathos and tragedy are instantly routed by the laugh.

**A Memorable Date.**  
"What member of the class can mention one memorable date in Roman history?" the teacher asked.  
"Antony's with Cleopatra," ventured one of the boys.—Everybody's.  
What is civilization? I answer, the power of good women.—Emerson.

**Water Works on the Farm**

Yes, that's just what we mean—real water works; running water in the kitchen, the bathroom, the laundry, the barn—in fact, all over the place. And it's all done by that tank you see in the lower left hand corner of this picture—the Leader System. It's vastly different from the old-fashioned elevated tank which worked by gravity. For the Leader Water Supply System is operated by compressed air—reliable, safe and cleanly. Your windmill pumps water into the tank (which is already full of air). The air, being elastic, is compressed into upper part of the tank, and forces the water out through the pipes.  
This gives you a pressure, so that a powerful stream of water is on tap at every faucet, no matter where it is located. And this means absolute fire-protection, for the pressure is always on and always ready.  
Now, the old style gravity tanks were either put in the attic or situated on a high tower out of doors.
