Correspondence

PARKDALE
C. T. Rawson is in the Lower Valley looking after nursery stock.
Geo. Monroe's new bungalow adds much to the appearance of the suburbs of Valley Crest.
John Gordon spent last Saturday and Sunday on his homestead, in company with Mr. Dresser.
Mrs. C. T. Rawson has ten acres slashed on her Firdale Farm three miles south of Parkdale.
The new Thompson and Millard bungalow, also large, new sixty-foot barn, adds much to the improvements and also to the land values.
Mrs. M. H. Roberts has been visiting her daughters in the mountains. She came up on the boat with Mrs. G. R. Stephenson from Portland.
C. E. McIntosh of Maple Hill has a tract of five acres cleared and set to fruit. His mother also has the same amount cleared and planted with fruit trees.
Miss Susie Mohr is spending her best moments in the improvement of her homestead. Last Sunday she spent the day at the homestead of Mrs. Annie Mohr Rush.
Mr. Thompson has charge of the Millard place just three miles south of Parkdale. At present he has a donkey engine at work pulling out the large timber on the place.
Mrs. G. R. Stephenson and children of Portland, who have been visiting Mrs. Stephenson's sisters, Mrs. C. R. Rawson and Mrs. Ralph Davies since July 24th, returned to their home on Friday, August 12.

BARRETT
Thos. Bishop went up to his wheat ranch in Sherman county last Wednesday.
H. L. Hasbrooke, who has been working in The Dalles, came home Saturday.
J. H. Dukes, who has the contract for moving the schoolhouse, has almost completed the work. W. T. Torry will do the excavating this week. The contract for building the new schoolhouse will be let soon.
Rev. Peart, pastor of the Valley church, recently came here from Minnesota, where he was pastor of the M. E. church. Since living in Hood River he can't get enough sleep. He sleeps until 10 a. m. every day. On Sunday morning the janitor has to ring the bell half an hour earlier in order to wake him up in time for service.

\$100 Reward, \$100
The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh, being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. Cheney & Co., Toledo, O. Sold by druggists, 75c. Take Hall's Family Pills for constipation.
Be sure and take a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy with you when starting on your trip this summer. It cannot be obtained on board the trains or steamers. Changes of water or climate often cause sudden attacks of diarrhoea, and it is best to be prepared. Sold by all dealers.
For Sale—Seven room house, two lots, small barn, corner Sixth and Sherman. Will sell furnished or unfurnished. Bath with hot and cold water. Apply at house. Mrs. Z. C. Phillips.*

MICRO
FOR ITCHING SCALP, DANDRUFF AND FALLING HAIR
Micro kills the Dandruff parasite, soothes the itching scalp, gives lustre to the hair and stimulates its growth. A single application gives relief and proves its worth. Do not be bald. Save your hair before too late. Micro is a delightful dressing for the hair, free from grease and sticky oils. Booklet free.

TO LONDON BY AIRSHIP.
Walter Wellman to Attempt This Trip in His Motor Balloon.
So far this has been a season of great progress in aviation on land, but before the year closes it is expected that the bird men will also have conquered the ocean. In fact, arrangements are now being made for a flight by airship across the Atlantic from New York to London. The attempt will be made by Walter Wellman shortly in the motor balloon known as the America, which was built for the Wellman polar expedition and twice severely tested in voyages on the Arctic ocean north of Spitzbergen.
The America when she starts on her long voyage will carry a crew of six men, including a Marconi operator and, of course, a full outfit of aeronautic and navigation instruments.

Some of the latter have been specially made for this voyage. An idea of the carrying capacity of the America is conveyed by the simple statement that she could take her crew of six, enough gasoline for a day's run and seventy-five passengers. The fuel supply for the transatlantic voyage is carried in a steel tank with a capacity of 1,600 gallons.
It goes without saying that the attempt of Mr. Wellman will be a most interesting aeronautic engineering and scientific adventure. Men have long talked of crossing the Atlantic by balloon or airship, but this will be the first actual attempt to make the voyage. It is all the more interesting because a Marconi wireless equipment is to be carried on the airship.

UNCLE REMUS MEMORIAL.
New Plans of the Association For Securing Home of the Author.
During his lifetime possibly no American author was more beloved than Joel Chandler Harris or more sincerely mourned at death. The creator of Br'er Rabbit and Br'er Fox and Sis Cow and Mis' Meadows and de gals had won for himself the love of millions. Especially was he loved by the children, and the child who has not heard the tale of "Br'er Rabbit and the Tar Baby" or the story of "How Br'er Bear Lost His Tail" has indeed missed a part of the heritage of childhood. For him the animals have no meaning. After the death of Mr. Harris an Uncle Remus Memorial association was organized, the object of which is to purchase the home of Uncle Remus from the Harris heirs and make a memorial of it. It is now planned to make this movement international.
The stories of the escapades of Br'er Rabbit are known all over the world, having been translated into seventeen languages, and the memorial association proposes to give the children of every land an opportunity to help. The Harris home is a modest cottage in West End, a suburb of Atlanta, and it has been the Mecca of hundreds who knew his tales. The property is assessed at \$25,000, and as soon as it became known that the Uncle Remus Memorial association could buy the property several rich men offered to give the entire amount.
The association plans to install a library in part of the house, to preserve memorial rooms where Mr. Harris lived and worked and to convert the grounds into a playground for children. It has also been suggested that a free kindergarten be conducted in the house. Upon the lawn a fountain will be placed, reproducing the well known four footed characters of his stories in bronze or marble. It is fitting that the home of Mr. Harris, who understood and loved children, should echo through the coming years with the shouts of children.
In October Colonel Roosevelt will visit Atlanta and make an address for the benefit of the association.

Water Works on the Farm
Yes, that's just what we mean—real water works; running water in the kitchen, the bathroom, the laundry, the barn—in fact, all over the place. And it's all done by that tank you see in the lower left hand corner of this picture—the Leader System. It's vastly different from the old-fashioned elevated tank which worked by gravity. For the Leader Water Supply System is operated by compressed air—reliable, safe and clean. Your windmill pumps water into the tank (which is already full of air). The air, being elastic, is compressed into upper part of the tank, and forces the water out through the pipes.
This gives you a pressure, so that a powerful stream of water is on tap at every faucet, no matter where it is located. And this means absolute fire-protection, for the pressure is always on and always ready.
Now, the old style gravity tanks were either put in the attic or situated on a high tower out of doors.
In the former case, their weight when full, cracked the plastering; or they overflowed or leaked, flooding the rooms below.
In the case of the outside tanks, the water often froze solid in winter, necessitating expensive plumbing bills; or it became hot and stagnant during the summer and unfit for use. The Leader System avoids all this, because the air-tight tank is either in the basement or buried underground below the frost line. Every outfit is complete, with full directions, and is easily installed. The Leader System needs no repairs, is suited to small buildings or large, and is moderate in price.
Let us send you our free booklet, "How I Solved the Water Supply Problem," the story of a man who successfully equipped his country home with modern water works.
Write for it today, before you forget
