The Cooking Ware That Lasts a Generation

"Wear-Ever" Aluminum Cooking Utensils are the kind that give you every satisfaction. Safety, Economy, Durability, Freedom from Worry.

You can cook the most delicate and easily scorched food in aluminum utensils with less fear of burning than in any other kind, because aluminum is a better distributor of heat and retains it longer.

This means a saving in fuel. But it means a saving in wear-and-tear expense, too.

"Wear-Ever" aluminum cooking utensils are strong, light to handle and easy to clean. They resist fire wear—you can let food boil dry in them without injuring the utensils. They are practically everlasting.

"Wear-Ever" utensils cannot rust, cannot form poisonous compounds with fruit acids or foods. They are made from thick, hard sheet aluminum, 99% pure, without seams, joints or solder.

Replace utensils that wear out with utensils that "Wear-Ever."
