

HAVE YOU LOOKED UP YOUR SPRING REQUIREMENTS IN THESE LINES?

BUGGIES

WE claim without hesitation that we have the most complete line of buggies ever offered for sale in Hood River. All the popular styles are shown; automobile seats, automobile tops, bent panels, double or single reaches; a variety not exceeded in many wholesale houses. Over seventy-five vehicles awaiting your choice. During the week past, we have had the pleasure of showing over one hundred people our immense stock. Each visitor exclaimed in delight at the beauty of finish, the new models, new conveniences and our arrangement of stock. Each visitor left with the impression that we are a larger concern than he ever imagined. Buying in quantities as we do, we are enabled to offer you better values for your money than anyone else. If we can't prove this statement to you, that is our loss, not yours. It costs you nothing to investigate.

WAGONS

We have just received a carload of Studebaker wagons, direct from the factory. We already had on hand something over two carloads. With this immense stock to choose from, you can certainly find what you want. We carry an immense stock of Mandt and Milburn wagons as well as Studebakers. You can buy them to suit yourself and your requirements—complete with double box and seat or the gear only; with a two inch tire or a three inch tire; wide track or narrow track. All our wagons carry our guarantee as well as the manufacturer's. Try us.

INCUBATORS AND BROODERS

We have sold more incubators and brooders in the past month than ever before. Why? Because people have been investigating. Investigation has sold more Petaluma incubators than all we have said. They are made right. The principles are right. The prices are right. The manufacturers guarantee a 90 per cent hatch. We carry extras and repairs for them, and stand ready to refund your money if you want it. Can you do as well as this when you send away back east for one? We have a catalogue for you which describes all the models, gives prices, etc. It is yours for the asking.

SPRAY PUMPS

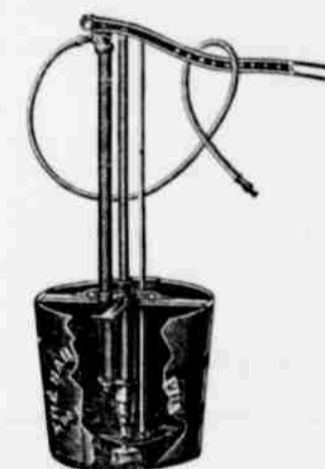

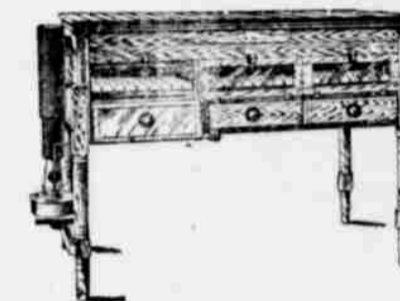

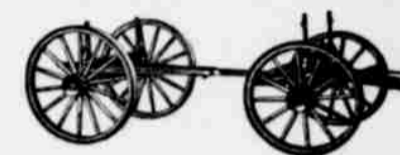

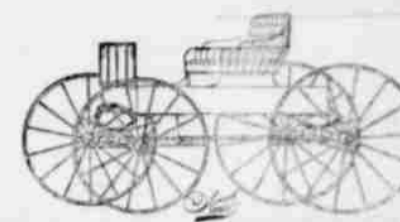

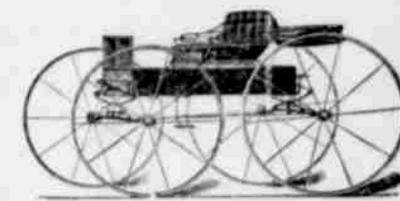

Here is a line of goods of which we are particularly proud. Our line comprises everything from a tin sprayer to a Hardie power sprayer. Tell us how much work you want to do, and we will tell you what the outfit will cost. Not only that, but we have our pumps so arranged that you can try them yourself and see what you are buying. Furthermore, we will take the pump entirely to pieces, and show you the material, the workmanship and principle that goes to make a good spray pump. This, with our guarantee on the goods as well as the manufacturer's should make you our customer. Our Hardie power sprayer has been so well advertised that we feel every man, woman and child in the valley must know about them. If you wish to know more about them, we will gladly mail you the latest catalogue, quoting prices, etc. Or, better still, come in and let us explain it personally. We have no competition in power sprayers when you consider it from the standpoint of durability, construction and efficiency. Our service department is an added inducement for you to buy the Hardie sprayer.

SPRAY FIXTURES

Everytning needed for spraying outfits, and all of the best. Nozzles of all descriptions, including Friend, Blizzard, Vermorels in one, two, three or four clusters, Bordeaux, Clippers, Vapos, Mistos, etc. Spray rods lined with iron, brass or aluminum. Cutoffs, stopcocks, dripguards, angles, undersprayers, etc., in profuse assortment. Seven ply spray hose, guaranteed to carry 200 pounds pressure for the full season.

SEPARATORS

The new Sharples Tubular separator is different from others. It is always in the lead. Not a "Has been" but a "Right now" separator. From the time the first one was built, Sharples Tubular cream separators have always been far in advance of other cream separators in the matter of superior construction, durability, simplicity, convenience, ease of operation, thoroughness of separation, beauty of outline, strength and general satisfaction. It has been the constant aim of the Sharples factory to make Tubulars better every year, and the catalogue will show you, both by illustration and description, how completely successful they have been. Send to us for it.
