WANTS HOOD RIVER MORE BEAUTIFUL

Always interested in anything for the improvement of this community, Mr. W. F. Shurley, of Baker, writes a letter to the editor of this paper last week to the effect that the corners of Baker, Chief and Main streets, and the pavement on the plank sidewalks, are not up to the standard set in this community.

Mr. Shurley goes on to say that the sidewalks should be repaired and the drab, worn, old pavement replaced with something new and attractive.

He suggests that the city pay for the new sidewalks and that the money be repaid by assessments on the homes and business places located near the sidewalks.

Mr. Shurley says that the city of Baker should get a better idea of what the people want and that they should be satisfied with nothing less than the best.

He further says that the city should not be afraid to spend the money to make the city a more attractive place to live in.

The city of Baker should take a leaf from the book of other cities and improve its streets and sidewalks.

SHAPES TIDAL PALM

The tidal palms in the Hood River Park are being shaped and trimmed by the Park Department.

The palms are being cut back to their natural size and shape, and the fronds are being trimmed to make them look more attractive.

The work is being done to improve the appearance of the park and to make it more pleasant for visitors.

The work is expected to be completed within the next few days.
