Grapes and Wine.

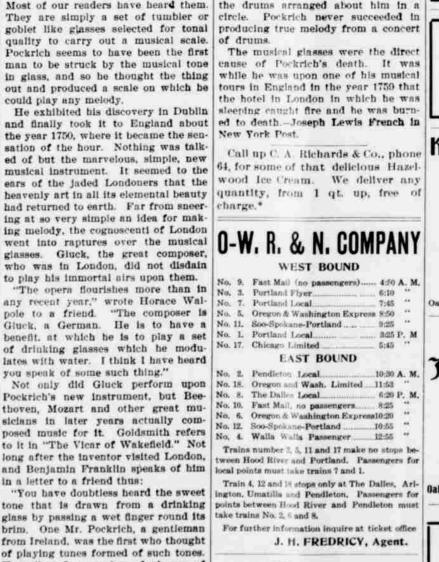

Most people think white grapes make white wine and dark grapes make red wine. It is a popular error. Red wine is made by fermenting grape juice and grape skins together, and white wine is made by fermenting grape juice alone.

Pockrich seems to have been the first man to be struck by the musical tone in glass, and so he thought the thing out and produced a scale on which he could play any melody. He exhibited his discovery in Dublin the year 1750, where it became the sen-

sation of the hour. Nothing was talked of but the marvelous, simple, new musical instrument. It seemed to the ears of the jaded Londoners that the had returned to earth. Far from sneering at so very simple an idea for making melody, the cognoscenti of London went into raptures over the musical glasses. Gluck, the great composer, who was in London, did not disdain to play his immortal airs upon them. "The opera flourishes more than in any recent year," wrote Horace Walpole to a friend. "The composer is Gluck, a German. He is to have a No. 11. Soo-Spokane-Portland benefit, at which he is to play a set of drinking glasses which he modulates with water. I think I have heard you speak of some such thing." Not only did Gluck perform upon Pockrich's new instrument, but Beethoven, Mozart and other great musicians in later years actually composed music for it. Goldsmith refers to it in "The Vicar of Wakefield." Not long after the inventor visited London, and Benjamin Franklin speaks of him in a letter to a friend thus: "You have doubtless heard the sweet tone that is drawn from a drinking glass by passing a wet finger round its brim. One Mr. Pockrich, a gentleman

from Ireland, was the first who thought of playing tunes formed of such tones. He collected a number of glasses of different sizes, fixed them near each other on a table and tuned them by putting into them water, more or less as each note required. The tones were brought out by passing his fingers round the brirn." There is a story of Pockrich, who was making occasional tours to England after the invention of the musical

glasses, that illustrates the surprising effect of his own performance on them. It is told by his friend Brockhill Newburgh, a gentleman of wealth and po sition, who lived in Dublin at the time: "Mr. Pockrich in his brewery near Islandbridge, happening to be one day seized by bailiffs, thus addressed them: " 'Gentlemen, I am your prisoner, but before I do myself the honor to attend
