Laborers wanted for construction work on new power plant. Hydro-Electric Co., near Tucker bridge. 41-42c

Wanted—A girl to do general housework, good wages. Apply to Mrs. Frank A. Cram.

PRESSURE OF WATER.

Its Effect Upon a Corked Bottle Lowered into Ocean Depths.

A bottle partly filled with fresh water and tightly corked can be lowered into ocean depths, and on being raised to the surface it will be discovered on opening it that the fresh water has been replaced by salt.

This extraordinary phenomenon is explained in the following way: The pressure of water increases as the distance from the surface increases. Thus at the distance of a foot beneath the surface the pressure of the water a square inch will be about half a pound; at a distance of, say, 200 feet it will be 125 pounds to the square inch. At ocean level the pressure of the atmosphere is a little over fourteen pounds. Thus if a bottle containing air were lowered thirty feet beneath the surface the pressure of water would more than counterbalance the pressure of the air. Ordinarily at this depth, therefore, the pressure of water should be sufficient to drive the cork within the bottle, but the cork is tightly wedged in position. To squeeze it within the bottle it, too, must first be compressed, and also there is friction to be overcome.

The distance varying, then, according to these conditions, at some point beneath the surface the weight of water will force the cork into the bottle, compressing the air before it. The salt water of the ocean mingles with the fresh water within the bottle. As the bottle again approaches the surface the air that remains within is subjected to less and less pressure till finally, now having itself a pressure greater than that of the water, it drives the cork back into position.—St. Louis Republic.

Counterfeit Detectors.

"Few men carry a bigger roll than the professional detector of counterfeits," said a receiving teller of one of the big banks recently. Each of these counterfeit detectors has a special license from the treasury department at Washington which permits him to carry about 150 samples of counterfeit money. It is a felony to have counterfeit money in your possession without proper authority. For each bogus bill the counterfeit detector carries a genuine note of the same kind and denomination for the purposes of comparison. The total value of this good money that is carried side by side with the bad is between \$40,000 and \$50,000. The bills run from a dollar up to \$1,000 in denomination.—New York Sun.

The Solar Plexus.

The Scriptural expression "bowels of compassion" is justified by the discoveries of modern science. Whenever anything affects our nerves we feel it more or less in our "innards." It is the solar plexus which is concerned in such emotionalism. Of course in itself it cannot feel, but it sends messages to the brain, which interprets them as coming from there. The solar plexus is a mass of nerves and nerve structures in the abdomen at the back of the stomach.—New York Tribune.

Her Great Love.

"Could you love me, darling?" he whispered, with a tender, pleading look in his eyes. "If I had only the one cent to my back?"

"I could," she replied softly as she nestled in his great strong arms. "If I knew you had sacrificed the others to buy me a new dress."—London Mail.

Different From Wall Street.

Wise Guy—Speculating in stocks is nothing but "fisherman's luck." Shorn Lamb—Hardly that. I've sometimes gone fishing and succeeded in saving my bait.—Chicago News.

Dodged the Dose.

"Didn't I give you a piece of pie last week?" demanded the cooking school graduate. "I didn't expect to see you again so soon."

"I fooled you, ma'am," replied the impudent tramp. "I didn't eat it."—Philadelphia Record.

THE DEATH DICE.

History of an Odd Gift of the Emperor of Germany.

There is shown in the Hohenzollern museum a gift of the emperor of Germany, the "death dice," with which one of his ancestors decided a difficult case in the seventeenth century. Their history is an interesting one.

A young girl had been murdered. Suspicion fell upon two soldiers, Ralph and Alfred, who were suitors for her hand. Both the accused men denied their guilt, and even torture failed to extract a confession from either of them. Then Elector Frederick William decided to cut the knot by means of the dice box. The two soldiers should throw for their lives and the loser should be executed as the murderer. The event was celebrated with great pomp and solemnity.

Ralph had the first chance and threw sixes, the highest possible number. The dice box was then given to Alfred. He fell on his knees and prayed aloud: "Almighty God, thou knowest I am innocent. Protect me, I beseech thee!"

Then he arose to his feet and threw the dice with such force that one of them broke. The whole one showed six, the broken one also gave six on the larger portion, and the fragment split off showed one. This was a total of thirteen, one beyond Ralph's throw. The audience held its breath in amazement.

"God has spoken," cried the prince. Ralph, appalled by what he regarded as a sign from heaven, confessed his guilt and was sentenced to death.

AN ALBATROSS IN FLIGHT.

The Camera Caught a Motion the Eye Could Not Discern.

An interesting application of photography to settle a disputed point in natural history was made by a naturalist on a voyage from British Columbia to San Francisco.

A large albatross had been following the steamer and keeping pace with it for several hours, and the wonder grew among the watchers on board the ship as to how the bird was able to fly so swiftly while apparently keeping its wings extended without flapping them. As this is a common method of flight with the albatross, the explanation used to be offered that the bird took advantage of slight winds and air currents and was so able to glide upon what might be called atmospheric slopes.

As the albatross sailed alongside the ship, about fifteen feet away, the naturalist snapped his camera at it and obtained a photograph that astonished him and his fellow passengers.

The photograph revealed, what no eye had caught, the wings of the albatross, each some five feet long, raised high above its back, in the act of making a downward stroke. The explanation naturally suggested was that more or less frequently the bird must have made a stroke of this kind with its wings, although the eye could not detect the motion, and that the camera chanced to be snapped at just the right moment.—Boston Globe.

Ancient Greeks Had Trades.

In the days of their greatest prosperity the Greeks probably excelled all other nations in the variety and excellence of their manufactures. Their sons were often the great scientists of their age, for "Phales of Miletus, one of the "seven wise men of antiquity," was an oil merchant; Socrates was a stone mason, who, like Hugh Miller, left the quarry and bench to become the teacher of nobles; Aristotle compounded drugs while trying to solve his "problems," apparently proposed by other tradesmen, artists, musicians, architects and engineers; Plato and Solon had callings as well as studies and political activities. So, too, all were soldiers, and few men in Athens failed to take their places in the phalanx or galley when Athens called on her sons to battle.—Charles Winslow Hall in National Magazine.

Liberty and Independence.

When the presidential struggle between Clay and Jackson was at its height it is related that a band of emigrants from Kentucky and the then other western states commenced to settle on the north side of the Missouri river and called their county Clay and the county seat Liberty.

At the same time another lot of emigrants from Virginia and other southern states pitched their tents on the south side of the Big Muddy and called their county Jackson and the capital Independence. And so it remains to this day. Clay stood for liberty and Jackson for independence.

The Cautious Tailor.

"Now, look here, Snippetton," pleaded Hackley, "why can't you be patient with his old bill of yours? I'm going to be married shortly to a girl who's worth her weight in gold."

"That's all right, Mr. Hackley," returned Snippetton, "but is she going to be worth my wait in gold? How much does she weigh?"—Judge.

In the Good Old Days.

Of course the old fashioned belle may have walked barefoot halfway to church to keep from spilling her Sunday shoes, but she didn't put her cologne in the bureau drawer when she went to bed.—Galveston News.

Another Discovery.

"Shakespeare was one of the ablest of brokers."

"How do you make that out?"

"By the number of stock quotations he furnished."—New York Times.

I call that man idle who might be better employed.—Socrates.

BACHELORS TO LEARN DOMESTIC SCIENCE

The ladies of St. Mark's Guild are busily completing all the details necessary to make the series of domestic science lectures a perfect success. These lectures will be given in Heilbronner hall at 3 o'clock sharp on the next three Saturday afternoons. The subject of the first lecture will be "Salads" and Mrs. Lawrence will have to assist her Mrs. Kanaga, a graduate from Armour Institute, Chicago, and Miss Horning, who is now in charge of this well known department at our own high school.

On the second Saturday, Oct. 28, Mrs. Lawrence will discuss cakes, with and without icings which will be of value to the expert cake makers in Hood River. On November 4th frozen dishes and pastry will be demonstrated.

Owing to the great demand Mrs. Lawrence has consented to give a special lecture to the bachelors of the valley and their friends interested. The price of the season tickets for

REAL ESTATE BULLETIN

the afternoon lectures is \$1.50, with reserved seat. Single tickets are 50 cents.

The Bachelors' Lecture will be 50 cents. Pay at the door.

Tickets may be had of Clarke, the jeweler, or at Clarke's drug store. After the lectures, tea and wafers will be served by the ladies of the Guild, for a small consideration.

Before and after the Domestic Science demonstration lectures there will be a demonstration of Silver Suds. Don't fail to see it.

Not to His Taste.

"Yes, our table is always up to date," boasted the would be fashionable landlady. "We have those beautiful red candles on it at supper time."

"Candles for supper?" gasped the prospective boarder. "Madam, do you think I am an Eskimo?"

PARKROSE

The most successful subdivision ever put on sale in the city of Portland "solves the high cost of living."

Parkrose is located just beyond Rose City Park, on the Sandy River Boulevard. The soil is the finest and for years has been producing delicious fruits and vegetables. It is situated on a gentle slope extending north from the O-W. R. & N. toward the Columbia River, possessing great scenic advantages.

Parkrose is a Sure, Safe Investment

It is in the direct path of the most rapidly growing section of the City of Portland. Stop for a moment and realize what this will mean in future values, especially when you can secure a whole acre in Parkrose for actually less than the price of a good city lot—and on very easy term.

Prices \$100 to \$1250 per acre; 10 per cent cash and 2 per cent per month with interest at 6 per cent.

Rose City Park cars will run to center of Parkrose.

Water will be piped to all tracts in Parkrose.
