

## Some Facts About Kewanee Water Systems

**I**N AN isolated water plant the demands are peculiar and unusually exacting. Most machinery is run by mechanics who can correct its faults, take up its wear and make repairs. Kewanee machinery must serve the average man in the out-of-way place. It must not fail; for water is life. It must go together without mistake, start without coaxing, run without skilled attention, wear the longest time possible, and be repaired by the unskilled man without tools or conveniences.

A KEWANEE SYSTEM meets these tests. It is a complete unit; every part made for, and accurately adjusted to every other part. It is the nearest approach to inexperience-proof machinery in the world. Every day for ten years has been a day of growth, of studying of problems, of training of men, of perfecting of machinery and design. The elevated tank, the crude assemblings of unskilled imitators, the unreliable toys advertised as "Fresh Water Systems," seem like relics of the dark ages.

What constitutes an ideal system of water supply?

First--It should not disfigure the landscape.

Second--It should not be exposed to extremes of temperature or the action of the elements.

Third--It should be so located that it will not be a menace to life and property in case of accident.

Fourth--It should be practically indestructible.

Fifth--It should be absolutely tight, so that no dust, disease germs, or other foreign substance can get into it.

Sixth--It should keep the water aerated, so it will not become foul or stagnant.

Seventh--It should have sufficient storage and high enough pressure for fire protection.

Eighth--It should be compact, simple and easy to operate.

The latest models of KEWANEE SYSTEMS fully meet these requirements. They leave little margin for improvement.

The steel tanks vary in size from two feet in diameter and six feet in length, holding 140 gallons and weighing 370 pounds, to monster tanks, nine feet in diameter and forty feet long, holding 19,000 gallons and weighing 25,000 pounds. Any number of tanks can be connected in a battery, giving any required amount of storage. The line of pumping machinery designed and built for the KEWANEE SYSTEM, covers the demand for every class and condition of service in all capacities from 100 gallons to 12,000 gallons per hour.

A KEWANEE SYSTEM of Water Supply is up to now. It will give perfect water service for anybody, under any conditions.

### INDIANS GATHER AT WHITE SALMON

The Klikitat Indians gathered at White Salmon the last of the week, for a two days' convention, called together by George Waters of the Yakima reservation, on matters concerning their financial affairs. Waters was one of the Indian representatives who met at Washington, D.C. to induce the government to grant them methods by which their finances would be handled to better advantage. One of their demands is that they be permitted to draw their money through the local banks. Waters was accompanied by Johnny Slaughter, an educated Indian who owns lands on the north end of White Salmon. White Salmon boasts of well-to-do Indians, who own fine tracts of timber in the mountain district. Some of them have cleared land, planted orchards and grain and own large droves of cattle.

When Ballard's Snow Lotion is rubbed in for rheumatic pains and aches, it reaches the spot quickly and the relief is very gratifying. Price 25c, 50c and \$1.00 per bottle. Sold by Chas. N. Clarke.\*

### APPLES A-1 FOOD; "THERE'S A REASON"

Do you know just what you are eating when you eat an apple? You are eating malic acid, the property that makes buttermilk so healthful, and gallic acid. Sugar in a very assimilable form, consisting of carbon, hydrogen and oxygen, caught and imprisoned from the sunshine, is present in considerable amounts. And phosphorus is present in the only form in which it is available as a tissue-building material.

The acids of the apple diminish the acidity of the stomach. Apples are nature's best complexion makers. And the water in the apple is in its purest form—much purer than any drinking water.

The ancients assigned the apple as the food for the gods and believed that its juices furnished the nectar which the gods used to restore their youth.

Men are the gods of today and the apple is their royal food. Eat apples and you will put the doctors' trust out of business.—Ex.

For sale, 75 Buff Orpington pullets, nine and eleven months old, fine stock, good layers. Write or call F. M. Eaton. Box 173.\*

### DEMAND IS STRONG FOR BOX APPLES

Strong demand and good prices for box apples, an over-supply of poor quality barreled stock with consequent low quotations, a prevailing quietness in general trade circles, and a political activity in favor of Theodore Roosevelt that has every promise of resulting in his nomination by the Republicans for the presidency, are the main comments made by Mr. Rose of the Wenatchee Produce Company who has just returned from a protracted sojourn in eastern cities. While away, Mr. Rose visited Salt Lake, Denver, Kansas City, St. Louis, Chicago, New York and Philadelphia, and in all these places discussed affairs with men prominent in trade, financial and political circles.

"There are from 1,000,000 to 1,500,000 more barrels of apples on hand in the eastern distributing centers now than there were a year ago this time," he said. "The fruit is keeping poorly and operators are losing heavily. Stock for which \$2.50 and \$2.75 a barrel was paid growers is selling for \$1.25; and there is no relief from domestic conditions in the export trade. Foreign markets are as bad, if not worse, than domestic markets. Box apples, particularly large sizes, command good prices and are moving easily into consumption. The fine condition of the box apple market is due principally to the shortage of the supply and, of course, to the poor quality of the barreled stock."

### MASON ADDRESSES NEWBERG FRUITMEN

At the last meeting of the Newberg Apple-Growers' Association, an address was made by A. L. Mason of Hood River, who was present by invitation. He gave a detailed account of methods followed by the orchardists of that locality and closed by saying—what was stated editorially in The Oregonian recently—that the chief problem in that connection now is to find a market.

He said that it had been estimated that the apple crop this year would amount to 27,000 carloads, but that this would give each man, woman and child in the United States only two apples. But for all that, it is only by a strong selling organization, he insisted, that the industry can be maintained at a profit.

Mr. Mason is one of the most successful of the Hood River growers, and on his own place receives an income of 10 per cent, net, on a valuation of \$2000 per acre. He was severe in denunciation of real estate men who plant out trees on land not adapted to fruit-growing and sell it in small tracts to newcomers.

### ROGUE RIVER FRUITMEN HOLD ANNUAL MEETING

Enthusiastically indorsing the plan of K. S. Miller to form a selling union with Hood River and Wenatchee and delegating a committee of three, W. L. Vawter, R. C. Washburn and K. S. Miller, to meet with representatives from these districts in Portland to perfect plans for such an agreement, the annual meeting of the Rogue River Fruit & Produce Association was held last week for the election of directors and officers.

Colonel R. C. Washburn was re-elected president and A. C. Randall vice-president. According to the report 45,949 boxes of pears were shipped out by the association in the last year, and 20,671 boxes of apples, which represent about 70 per cent of the valley's output. The average prices for fancy four-tier pears were: Bartlett's, \$1.12; Clingdon, \$1.24; Howells, \$2.24; Anjou's, \$2.24; Bosc, \$2.56; Winter Nellis, \$2.12; Comtee ranged from \$2.80 to \$1.13; Yellow Newtowns brought \$1.99 to \$1.53; Ben Davis averaged \$1.

### UNION AT YAKIMA LOSES \$15,000.00

The failure of the fruit-buying firm of Nichols & Son of London, which owed the Yakima Horticultural Union \$15,000 for apples bought last year, not only wipes out this year's profits of \$653 of the union, but exhausted the reserve fund of \$14,778 created at the end of the 1910 season from the profits of that year.

The Yakima County Horticultural Union, a selling agency in which the stock is owned by the fruit growers, pays its members for their apples and other fruit and sells them in the markets of the world. If it reaps a profit over the cost of the agency, it is distributed to the stockholders in dividends. No dividend was declared at the end of 1910, although the agency had realized a profit of \$14,778. This was voted to be set aside as a surplus.

Last year the union sold 185 cars of fruit, of which 84 were apples, but prices in the eastern markets were so low that the excess of receipts was but \$653 over costs.

Averaging the prices for all varieties of apples handled, the report shows the following averages:

Extra fancy, four-tier, \$1.58 2-5; four and a half-tier, \$1.49 1-7; five-tier, \$1.30 2-9.

Standard four-tier, \$1.03 1-6; four and a half-tier, \$1.00 2-5; five-tier, \$0.75 2-3.

The average price, per box, for all grades, reached in the same manner, was approximately \$1.20 1-2.

The report of manager C. R. Pad-dock says:

"In making up the average we have given nothing but the exact prices returned to the growers. The only difference in the prices given and the net to the grower is the 8 cents per box that we charge for handling. As it is the net to the grower that counts, we are of the belief that our prices will compare very favorably with those of other organizations, looked at from the growers' standpoint."

Sedentary habits, lack of outdoor exercise, insufficient mastication of food, constipation, a torpid liver, worry and anxiety, are the most common causes of stomach troubles. Correct your habits and take Chamberlain's Stomach and Liver Tablets and you will soon be well again. For sale by all dealers.\*

### WE FURNISH FRUIT PICKERS AND PACKERS

And All Kinds of Employees...  
**NIGUMA & CO.**

Phone 160
