**Women Should Do the Proposing, Not the Men**

By GEORGE WILLIS COOKE, Lecturer at Boston School of Social Science

**W**OMEN should do the proposing to the men nowadays. The supremacy of man in the family is untenable. Conditions will be bettered by an equality of the sexes, and MARRIAGES WILL BE HAPPIER WHEN WOMEN DO THE COURTING.

SHYNESS IS NOT ESSENTIALLY A FEMININE QUALITY, BUT SIMPLY THE RESULT OF TEACHING. WOMAN AT THE PRESENT TIME SEEMS TO BE GETTING A BETTER EDUCATION THAN MAN AND THEREFORE SHOULD BE ABLE TO SELECT A HELPMATE MORE INTELLIGENTLY THAN A MAN CAN DO.

She is taking the initiative in business and in politics, and the time is coming when she should also take it in love. Certainly a GIRL SHOULD PROPOSE TO A MAN IF HE IS HER IDEAL. Economic independence will give them this liberty. With the coming of suffrage they will act for themselves not only politically, but socially.

Diffidence and shyness of girls in lovemaking is a SUBTERFUGE—a part of the present social teachings. When women are taught or learn to act naturally their present FALSE MODESTY WILL FALL away, and they will do the proposing, as they ought.

Among the Zuni Indians it is the boy who is so called modest, diffident and shy. This is plain, for there he leaves his own home when married, just as the girl does here, the WIFE being then the property owner. She CONTROLS THE HOUSE AND LANDS AND DIRECTS THE BUSINESS AFFAIRS OF THE FAMILY.

And be it known that the Zuni women are extremely modest and virtuous, and they would afford in this respect a very good example for the American women.

**Would you hitch four horses to a single buggy?**

Of course not—and it's just as wasteful to use a four-cylinder automobile when the single-cylinder Brush Runabout will do your work. And it will *do* your work. A Brush Runabout will cover three times the area possible with your horse and buggy—in the same time—and do it at less expense.

The **Brush Runabout** \$450  
A guaranteed, efficient automobile

A four-cylinder car consumes two or three times the gasoline and oil used by a single-cylinder Brush—and the cost of maintaining and operating the four-cylinder car is six to eight times as much.

The Brush costs only one cent a mile to operate. The winner of an Economy Contest drove his Brush 100 miles at a total cost of 39 cents—another ran 48.4 miles on one gallon of gasoline. As one of many instances of its wonderful durability, a Brush owner states after 10 months' usage that he has driven his car 10,000 miles, with no expense for repairs of any kind.

The advantages of the single-cylinder—economy, efficiency and simplicity—have long been recognized in Europe, where they make single-cylinder cars costing five to eight times as much as the Brush.

The Brush is a real automobile, as highly developed on a smaller plan as expensive large cars. Each car is equipped with shock-absorbing devices under the Truffault-Hartford patents, top, storm front, gas lamps, generator, tools, etc.

Come in and see this car. Let us show you how it will save you time and money and increase your business.
