We reminded Clarence that there were snakes in that section and he told us that he was fixed for 'em. Later and latest: Well, the reporter is up against it. Since the above was set to type Clarence was discovered boarding the Pullman on the Spokane Flyer west bound in company with his companion, and L. E. The NEWS tells it all.

Statistics compiled by the department of agriculture show that the population of the country, as well as its number of dairy cows, has doubled within the past thirty-five years, the present number of the latter being put at 22,000,000. It is a matter for interesting conjecture just where the 44,000,000 dairy cows are going to come from in the next thirty-five years if the process of elimination continues as a result of applying the Babcock test. However, there won't be so many cows needed if the star boarders are eliminated from the herds of the country.

A good deal may be done toward augmenting the output of feed from the field of corn by sowing rape either just before or just after the last cultivation at the rate of about five pounds to the acre. If the summer is very dry the seed will be slow in starting, but the plants will grow rapidly with the moisture and cooler weather of the early fall. The rape pasture is especially good to those who practice hogging down their corn or turning sheep into the field. South of latitude 42 cowpeas may be used more advantageously for the same purpose, having this advantage over rape—that they not only furnish good feed, but enrich the soil at the same time.

NOTICE

Property owners of Hood River County (outside the city limits of the city of Hood River) are hereby notified that it is unlawful to permit the following weeds to grow on their premises until they shed their bloom or form seed: Russian thistle, the Canada thistle, the Chinese thistle, or sisymbrium altissum (called white mustard), cocklebur (known as the dagger cocklebur, atriplex argenta (called silver salt bush). It is made the duty of the road supervisors of the county to observe if there are any of these weeds growing in the county, and they have been instructed to ascertain if the law is being complied with, and, if necessary, to destroy these weeds at the expense of the property owners.
