THE HOOD RIVER NEWS, WEDNESDAY, APRIL 16, 1913

HOW TO CONTROL FIRE BLIGHT TOLD

(O. A. C. Pest Report)

Fire blight is the most serious of all the diseases which attack the pear so slight as to be easily overlooked. and apple. It is a contagious disease er limbs and trunks are not too extenof bacterial origin., which, under proper conditions, may attack any part of sive, the limb or tree may be frequent following: ly saved by carefully shaving off the the tree. Besides the pear and apple, diseased bark of the cankers to the the quince, wild crab-apple, hawthorne, sapwood. Here again one should cut authorize the school board to purchase mountain ash, service berry and some other pomaceous trees are subject to well beyond the point of infection, esattacks of this disease.

since the germs spread most rapidly district. Fire blight is known to occur in Oregon, as the present time in the up and down from the point of infecnortheastern part of the state in Un tion

In cutting out the cankers it is necion and Umatilla counties and as far essary that the tools be kept moist west along the Columbia as the flood with some good disinfectant. If this is River Valley, and in the southwestern part of the state, including the Rogue canker, each cut will re-inoculate the River and Umpqua Valleys, I: is not germs into the bark at the edges of at present known in the Willametre the canker and the labor may thus be 1915. Valley nor in the coast region. I' is known to occur in Klamath, "trant, useless,

Baker, Crook and Malheur counties, and is perhaps quite generally distric uted throughout the central and eastern part of the state, though the details of the distribution in that part of

Oregon are not known. Fire blight is caused by a minute organism belonging to the bacteria and known technically as Bacillus amylovorus. It is a rod-shaped, motile germ which divides very rapidly by simple fission and is found in immense numbers in the diseased tissue. The germs are so minute that they measure only about 1-25000 of an inch in length and are visible only under the

highest magnification of the compound microscope. Beginning in the spring the first ap

Has Made Its Way By the Way It's Made

HEN we began marketing the Interago the one idea uppermost was to sell a useful car. That meant-a car for country roads, that would safely carry a reasonable load, always get there and back, and last long enough to be very profitable.

Some of those first cars are still doing an honest day's work every day. All of them paid for themselves. None of them was so efficient as the car we sell today. Now is the time to buy an

International Commercial Car

For the merchant engaged in any business requiring much light hauling, or prompt deliveries; for the business man who wishes to extend his territory; for the man who wants to cut down delivery expenses and at the same time be progressive and up-to-date, an International Commercial car is a good investment.

Simple, sure, powerful, it climbs hills, goes through mud-holes and sandy stretches, anywhere a team can travel at any speed from 3 to 18 miles an hour. Transmission is simple and direct. Brakes are powerful. Bearings are strong. A single lever controls the car. Write for catalogues and any information desired.
