What are Humors?

They are vitiated or morbid fluids coursing the veins and affecting the tissues. They are commonly due to defective digestion but are sometimes inherited.

How do they manifest themselves? In many forms of cutaneous eruption, salt rheum or eczema, pimples and boils, and in weakness, languor, general debility. How are they expelled? By

Hood's Sarsaparilla which also builds up the system that has suffered from them.

It is the best medicine for all humors.

Contradictions.

"Well, Digby, I'm surprised! You're getting gray!"
"Yes, yes; I'v got lots of gray hairs
and precious few of them."

THE EGG INDUSTRY.

GROWTH OF POULTRY TRACE IN THIS COUNTRY.

Cur Empire Are Overter than Ever Beiore, White Importe Short a Deci ed Decrease-Poutry-Rai ing May Be Moa a Profitable Occupation.

The egg industry is of considerable commercial importance. The total number of eggs produced in the United States in 1860 was estimated to be 320,-000,000 dozen, and there figures are Caite often said to be too low. The United States formerly imported a large number of eggs and exported very few. The ratio has changed within the last ten years, and now the exports largely exceed the imports. In 1890 the total number exported was, in round numbers, 381,000 dozen, worth \$59,000; in 1899, 3,694,000 dozen, worth \$341,000. In 1890 this country imported 15,000,600 dozen, which were valued at \$2,000,000, and in 1899 only 225,000 dozen, valued at \$21,000.

Taking lute account the five years up to and including 1898, 61 per cent of the experted eggs were sent to Cuba, 20 per cent to Camada, and 11 per cent to Great Britain. Luring the same period 66 per cent of the eggs imported came from Canaoa, 3 per cent from China, and the remainder from various other countries.

These statistice of the egg trade are of interest because they show the great growth of the poultry industry, and indicate what it may become to the future. Some of the developments may be fairly attributed to the work of the Government, and the agricultural experiment stations. For many years a considerable number of the stations. especially those in Alabama, California, Indiana, Kentucky, Louislana, Maine, Massachusetts, Michigan, New York, North Carolina, North Dakota, Okahoma, Oregon, Rhode Island. South Carolina, Utah, and West Virginia, have been experimenting upon methods of feeding and caring for poul ury, the comparative value of different breeds, the possibility of increasing egz production by proper feeding and selection of laying stock, and similar problems. The Department of Agriculture has done much to encourage the poaltry industry by collecting and distributing information and in other

Poultry raising is often carried on in conjunction with general farming, and may La profitably developed along such lines. When it is followed as an indereadent enterprise, its possibilities are also great. There is always a market for poultry and eggs for food, while the raising of fancy stock for treeding pur- all. " poses is frequently worth consideration.

Jodged by available statistics, eggs compare favorably with the .nore common animal foods, and it is shown that the high food value of eggs is appreclated, and that they constitute one of Accuracy above everything else is the very important articles of diet in

relative amount of nurriment material contributed by each in proportion to the total cost. Compared with other to foods at the usual prices, eggs at 12 cents par dozen were found to be a cheap scurce of nutrients; at 16 centa per dozen they were fairly engage ve. and at 25 cents per desen and over they were very expensive.-Washington Star.

Our Troops in China.

In spite of his many handleaps the American soldier has fully teld his own, says Scribner's. He has numerous weaknesses, but tear of the enemy is not, fortunately for the Republic, among them. I heard foreign officers freely criticise his military manners and organization, but never his fight ing qualities, once his burden of autiquaced methods has been cast aside and be faces the foe on the firing-line Then is he as he always was, and, let us hope, always will be. In all the criticism one hears there is an undercurrent of respect. I never see him in a fight but I feel, with absolute certainty, that the American soldier will ever give a good account of himself if not asked to do more than should be asked of a man. Other elements being approximately equal, the stoutest heart and the steadiest nerve will win the most battles. In these qualities, Uncle Sam's boys are second to none. "They've done their share," is the verdict of people in China, who have been here through it all.

Historical Associations.

In the South Carolina Legislature the President of the Senate and the Epeaker of the House wear silk robes while presiding over their respective houses. This custom is about a century old, and its origin is somewhat obscure. Present attention to the matter arises from a change in the color of the robes from the original ultra-marine blue. Over this the South Carolina papers are justly agitated. At one time, far distant, the robe was red, instead of blue, but both colors are those of the national flag, and either, in the South Carolina view, is preferable to the robe of the royal purple donned by the Speaker at the recent session, the gown of heliotrope gracefully worn by the President of the Senate. The robe worn by the former Speaker was blue, and the press saks W. H. SMITH & CO., Buffalo, N. Y. toat that color, which has some historical associations, be fixed by statute.

A perfect light means more than a A perfect light means a light that is brilliant and steady, one that gives little heat, no smoke, and no odor, and one that costs but little to burn and needs but slight attention. Wouldn't you call a light like this a perfect light? If you had such a ight wouldn't you think it better than gas or electricity; wouldn't you say it had all their advantages and none of their faults? Well, there is such a light—it's the angle lamp and besides these points its throws the light just where it is wanted. It is a perfect substitute for gas or electricity. When stores, churches or houses are lighted with it they look cheerful and attractive. Of course it costs more than poor, old fashioned lamps, but it saves its cost many times over in a year. It's cheap at any price. styles from one burner up. Send for catalogue. Jackson L. Brown, 276 Taylor street.
