81. Butte, Montana,

A Few Important Reasons Why you thould invest your money in But'e City Property: Butto has doubled in population in the last

Butta has doubted in population six years.
Outside of the natural growth of Futte, the intending improvements of the Mining Companies will increase the population to 100,000 in there years.
There were 750 buildings constructed last year.
There are over 1,000 buildings contracts d for to build this year.
There are no desirable houses for rent.
There is more no estimable houses for rent.
There is more no gatey percapita in circulation in Butte than in any other city of its size in the United States.

Lots selling for from \$100 to \$250 five years ago in the southern part of town are now selling for from \$800 to \$1,200.

Had you invested in Butte property five years ago you would be rich today.

A FEW FACTS Why Lots in SOUTH PARK, Butte City, Mon-tana, are the most desirable for the money.

tana, are the most desirable for the money. The electric cars take you every 15 minutes to the property direct from the business center of Butte in live minutes for live cents.

Water mains run through the ground.

The property is as level and smooth as a billing table.

Good well water can be obtained at a depth of 20 feet.

Main Street, the principal business street in Butte, runs through the property.

There is a fine school one block from the Park. There is no smelter smoke in South Park. Vegetation grows all over the property.

Finally, there are no lots in Butte City with the above facilities for the money.

We deed the mineral with the surface, which no doubt will be worth considerable in
