Advertisements.

Jay Printing.

From the Weekly Evening Star.

The Electro-Depositor contains a description and directions for printing, but it contains also a list of prices, and it is in all respects a complete printingpress, and is constructed in such a manner as to be as easily and safely operated as a typewriter.

The press was invented by a gentleman who is a native of this country, and who has been engaged in the printing business for many years. It is now in operation in the city of New York, and is in use by several of the publishers of that city.

The press is capable of printing a sheet of paper in a few seconds, and is calculated to print a large number of sheets at a time. It is constructed of steel, and is thoroughly made to last for many years.

The press is intended for the use of those who are engaged in the printing business, and who wish to obtain a cheap and quick method of printing. It is also calculated for the use of those who are not acquainted with the art of printing, and who wish to have their books, pamphlets, and other printed matter done in a cheap and easy manner.

The press is in great demand, and is now in constant use by many of the publishers of this country. It is calculated to be an improvement in the art of printing, and is calculated to save much time and labor.

The press is fully described in the advertisements of this paper, and is in every respect calculated to meet the wants of those who are engaged in the printing business, and who wish to obtain a cheap and quick method of printing.
