BIG FIGURES.—Senator James in his new Tariff Bill gives us the following magnificent statistics:

"By the census of 1850 it appears that the amount of capital invested in the manufactures of cotton, wool, and iron, only, was but a fraction less than $150,000,000. The raw materials consumed by these three cost over $87,000,000 per annum. Their combined product is estimated at $160,000,000. Thus, we have nearly $75,000,000, by means of these three branches alone added, mostly by labor, to the wealth of the country, even though the proprietors should gain nothing by their business. Again, these three branches alone employ nearly two hundred thousand persons. The entire amount of capital employed in all the various branches is set down at $530,000,000; while the number of persons employed exceeds a million. The raw materials consumed are estimated at $550,000,000 per anum, and the value of the annual product at more than $1,000,000,000. This exhibit shows an annual absolute creation of wealth in our country from these sources of more than $450,000,000.

"THE LEADING ARTICLE."—Mr. Macaulay tells us that what is now called the leading article in a newspaper, seldom appeared after the censorship of the press expired in 1675, unless there was a want of news!—"When there was a scarcity of intelligence, when the Dutch mails were detained by the west wind, when the rapparees were quiet in the bog of Allen, when no stage-coach had been stopped by highwaymen, when no conjuring congregation had been dispersed by constables, when no ambassador had made his entry with a long train of coaches and six, when no lord or poet had been buried in the Abbey, and when, consequently, it was difficult to fill up four scanty pages," then the editors supplied a leading article.

☞ According to the Report of the Secretary of the Treasury, on commerce and navigation, the five cities of the Union which contain the largest amount of steam tonnage are the following:

New York,	107,692 tons.
Pittsburg,	81,396 "
New Orleans,	62,532 "
St. Louis,	52,477 "
Buffalo,	38,262 "

WELL FORGOTTEN.—The Binghamton (N Y) *Democrat* says—"The London Telegraph, enumerating the American cities which the Britishers could take 'just as easy' in case of war between the two countries, leaves out New Orleans altogether! We can't account for the omission except on the ground that they took it in 1815, and do not think it necessary to take it over again."

☞ A correspondent of the *National Intelligencer* says that the Mississippi river did not "freeze throughout its entire length" this winter, as has been represented. It was open for navigation during the entire winter from Memphis to New Orleans. Some floating ice was to be seen on it as low down as Bayou Sara; perhaps small quantities as low down as Baton Rouge. It was formed on the banks, at the water's edge, in small quantities, as low down as Natchez, perhaps as low down as the mouth of Red River. To this extent, no more, did the Mississippi River "freeze throughout its entire length." The same thing has occurred in previous years.

MRS. LUCY STONE.—The editor of the Dayton Journal says—

"Having seen the lady's name registered at the Phillips House as '*Miss* L. Stone,' we ventured to inquire if she desired to be addressed as 'Miss Lucy Stone, or Lucy Stone Blackwell, as the papers sometimes designated her.' I will call myself '*Mrs.* Lucy Stone, sir,' was the gracious reply."

Well, that will do! We don't offer "Mrs. Lucy" our hat, for she has doubtless got one of her own, to match her breeches!—Woman's rights, forsooth! Where, we should like to know, are Mr. Blackwell's rights? What is to be the name of the children? Stone, of course. Hard for the babies—hard for Blackwell—and extremely hard all around. This comes of that "marriage under protest," which, so far as the husband is concerned, turns out a solitary sort of thing—a mere "Blackwell's Island," so to speak. Heaven help him!—*Boston Post.*

NAPOLEON'S SWORD—RELICS OF THE LATE EMPEROR NICHOLAS.—The sword worn by Napoleon Bonaparte at the battle of Marengo, Austria, in 1800, was purchased by the Emperor Nicholas in 1850, just half a century after that eventful and bloody battle, for the enormous sum of *thirty-two thousand dollars.* To Nicholas, a sword worn by so distinguished a soldier, in a battle that lasted fourteen hours, and victory waved on each side four times, in which sixty pieces of cannon were alternately won and lost, and finally carried by the French, possessed a value in his eyes, that could not be estimated in dollars and cents. It was purchased, and placed among other relics once possessed by Napoleon at different periods of his life, and collected by that distinguished Emperor. It is said the other relics, (diamonds, medals, and tokens of honor,) are of great value and may have entered largely into the motives of Louis Napoleon to war with his highness, the Autocrat of Russia. Could he possess them by the achievement of a victory, he would doubtless, feel that the inspiration of the great captain, his uncle, had truly descended upon him and nothing short of the fame of the all conquering Alexander, would satisfy his ambition for glory.—*Buf. Express.*

☞ Capt. Ericsson, it is said, has nearly completed a caloric engine to furnish motive power to a large manufacturing establishment in New York. He has constructed a 30 horse power engine for a party in Europe.

THE DOME OF THE CAPITOL.—A correspondent of the Pennsylvania Enquirer, writing from Washington, thus speaks of the improvements of the Capitol:

"The new dome intended to surmount the Capitol, and rendered architecturally necessary by reason of the extension of that building, is to be a magnificent affair, excelling every thing of the kind in this country, and vieing with the most famous ones in Europe. It is to be constructed of cast iron, and some idea of its size and workmanship may be had in knowing that Mr. Walter, the architect, estimates its cost at $945,000. The old one has already been pulled down, and work will soon commence on the new one. When the dome and the two extensions are completed, the Capitol will be one of the greatest structures in the world."

TRADE OF BUFFALO.—The Buffalo *Courier* claims for that city the position of being the first inland commercial city on this Continent, giving the following figures:

	Imports.	Exports.
Lake,	$50,246,819	$110,000,000
Canal,	89,218,036	30,654,283
Central Railroad,	35,000,000	15,000,000
Buffalo City Railroad,	8,000,000	4,000,000
Buffalo & Erie Railroad,	10,968,484	4,570,451
Foreign Trade,	2,131,205	935,176
Total commerce, 1855,	$195,664,444	$165,159,920
" " 1854,	158,000,000	130,000,000
Increase in 1855;	$37,664,444	$35,159,920

☞ The camel experiment over the plains, (for mail and other transport,) for which Congress made appropriation two years ago, will soon be tried. The camels are now *en route* from Asia Minor. The whole number is 33, viz: 9 male and 15 female camels; 4 male and 5 female dromedaries. The vessels with this cargo are expected to arrive in Texas about this time. Several of the animals are presents from the Viceroy of Egypt.

☞ The *Bombay Times* says that Col. Jacob's rifle ball is made of zinc and lead. The softer metal alone was found to be useless. The ball lost its shape altogether after it had been fired, or become lopsided. Col. Jacob believes that an army of fifty thousand men, trained and picked, and provided with the improved Minie might defy all the armies of the world. The opinion has been denounced as extravagant. Yet it is just possible that this may be the next great change in the art of war, and that the first power which employs it on a great scale may obtain a momentary but complete superiority. The half disciplined marksmen of the United States have defeated British troops ere this. In the Mexican war twenty or thirty Kentucky riflemen, each of them probably trained up to Col. Jacob's standard, repeatedly held whole regiments of Mexicans at bay. The survivors of the attack on New Orleans declared that nothing cowed the men like the single Louisianian who as they advanced shot down the lefthand man. He took them regularly man by man, and the deadly precision of his aim frightened men who would not have shrunk from the fire of a platoon, armed with the much vaunted Brown Bess.—*Friend of India, English Paper.*

PROGRESS OF IMPROVEMENT.—The Panama Railway is now complete from one side of the Isthmus to the other, a distance of 49 miles, rising at one part of the line to a height of 250 feet above the sea. The cost of this work is $7,000,000.—The railway from Alexandria to Cairo, 130 miles, will be opened through the entire route as soon as the three bridges are finished; and then locomotives will go screaming and panting through the land of the Pharaohs. In India, too, the railway is open for 120 miles, and a train leaves Calcutta one day, and returns the next. This, for Hindostan, is good progress; but the Indian telegraph may be cited as an instance of praiseworthy enterprise—3000 miles having been erected in less than 12 months, at a cost of about $200 per mile.

THE ANDES.—The range of mountains called the Andes or Cordilleras extends 4300 miles along the coast of the Pacific Ocean, from the Isthmus of Panama to the Straits of Magellan. The highest peak is Sorato, in Bolivia, which has been ascertained to be 25,250 feet above the level of the sea. This is the highest peak of land in the world, with one single exception, that of Jahavah, one of the peaks of the Himmalah Mountains in Asia. It is supposed by many that the Cordilleras of Mexico are, together with the Rocky Mountains, part of the chain of the Andes. The highest volcanic peak in the world is that of Cotopaxi, one of the peaks of the Andes, near Chimborazo. Volcanic mountains are generaly isolated, and nearly all solitary mountains are volcanic.—*Geographical Researches.*

COST OF THE GREAT PYRAMID.—Mr. Tite, the English architect, states the original dimensions of the Great Pyramid of Egypt to have been 764 square feet at the base, and 480 feet of perpendicular height; covering over 43 acres of ground. It consumed 89,028,000 cubic feet of stone; and could not now be built for less than £30,000,000, or one hundred and fifty million dollars. The joints of the large casing blocks of granite were so fine as to be scarcely perceptible, not thicker than paper; and the mortar was so adhesive, that the stone in some cases broke through their substance rather than give way at their jointing.

AMERICAN IRON RAILS.—American rails are decided now, on the best authority, to be superior to English or Welch of the same price. The latter shell off and wear out sooner than the American, and the superiority of the American is said to be owing to the fact that in the process of rolling, the rails are re-heated, while the foreign rails are completed with one heating.

☞ The *Bombay Times* mentions that two lines of Electric Telegraph are on their way from Europe to India. One connects Sardinia and Africa, and will be extended to Alexandria. The other proceeds from Constantinople to the same port.

PARTY NAMES.—The New York *Herald* is somewhat noted for its faculty of calling names.—It had occasion the other day to make a great number of extracts from political newspapers, and in crediting each paper with its own thunder, gave a short description of its politics. From these we learn that there are now the following political parties in the United States: "Know-Nothing," "Old Line Whig," "Democrat," "Nigger-Worshiper," "Whig Know-Nothing," "Whig Anti-Know-Nothing Nigger-Worshiper," "Hard-Shell Know-Nothing," "Whig Nigger-Worshiper," "Whig Know-Nothing Nigger-Worshiper," "Whig and Milk and Molasses Know-Nothing Nigger-Worshiper," "Dyed-in-the-Wool Botts Know-Nothing," "Twelfth Section Know-Nothing," Whig-Silver Grey Know-Nothing half Nigger Worshiper."

This seems something like "fusion." Things are getting mixed up.—*Life Illustrated.*

☞ The best modern Hibernicism was that perpetrated by Mr. McKeon, of New York, when in Congress. When in the midst of a speech, and on being called to order by a member for being personal, in remarks—"I am not personal Mr. Speaker. I had no reference to the sensitive gentleman in what I said; but, sir, this is not the first time that an arrow shot at a venture has hit the very mark that was intended."

☞ Right, not policy, should govern our action.

☞ When a man's coat is threadbare, it's easy to pick a hole in it.

Farm for Sale.

A FARM of 640 acres of land in Yamhill county, six miles west of Lafayette, is offered for sale. There are 80 acres in cultivation, and 150 acres in pasture—an orchard of 50 bearing apple trees. The place is well watered and timbered, and has two wells of excellent water, good buildings and out-houses. The land is as good as there is in Oregon or the world, and its location makes it as good a stock farm as there is in the Territory. Farming utensils and stock will be sold with the place, if desired. The claim is well stocked with cattle, horses, and hogs, and can be had on reasonable terms.

☞ Inquire at THE ARGUS Office, Oregon City.

Water Power for Sale.

THE undersigned would like to sell one half of his mills and water power on the Tualatin river, about three miles from Linn City, known as Moore's Mills. It is probably the best water privilege, with the exception of the great Falls of the Willamette, that there is in Oregon. I would like to sell one-half or one-fourth of my claim together with the mills and water power. My object is to get a partner, to enable me to properly improve the water power. JAMES M. MOORE.

Feb. 9, 1856. 43tf

Something New.

ANY person having a Melodeon, Seraphine, Accordeon, or other reed instrument, with broken or defective reeds, can have them repaired by applying or sending to Chas. M. Kester, at his residence, two squares back from the Baptist Meeting House, in the North part of Oregon City. Charge for inserting single reeds from $1,50 to $2,00. Reasonable deduction for a greater number. C. M. KESTER.

Sebastopol has Fallen!

AND CHARMAN & WARNER wish to inform the citizens of Oregon City and the public in general that they have just received a good assortment of *GROCERIES* suitable for this season of the year. Also, we have received a supply of fancy groceries, such as *Farina, Sugar Tapioca, Arrow Root,* and a variety of other such articles too numerous to mention.

We have a good assortment of *FANCY GOODS* for the holidays, such as raisins, dates, figs, bottled pie fruits, raspberry preserves, and a variety of other articles in this line, such as will suit the greatest epicure of the land. We have also on hand a good assortment of candies, and are receiving a supply nearly every steamer. So please give us a call; we will sell as cheap as any house in Oregon. Our motto is that a quick penny is better than a slow shilling.

We are now commencing to prepare in the Bakery for Christmas, and shall have a good assortment of cake. We shall also keep on hand a superior quality of butter crackers, Boston, crackers, and also the sweet York crackers. Please give orders for the above in good time. Our prices shall be reasonable, and the goods made of the best materials in Oregon. nov24

Who Wants a Good Saddle?

THE subscriber, living five miles south-west of Lafayette, in Yamhill county, is now carrying on the business of Saddle Making in good earnest. He keeps constantly on hand the best saddles that can be manufactured with the materials at command in Oregon. Those wishing a genuine saddle warranted to fit on both sides, and rigged out in complete style, cheap for cash, or good trade would do well to give me a call. My shop is situated on Bakers Creek near where the road crosses it leading from Portland and Oregon City, "up country" by the way of Smith's bridge on the North Fork of Yamhill.

☞ I keep every thing in the saddlery line, as Bridles, Martingales, Halters, Lines, &c., &c.
