series of interesting articles about the Mammoth Cave of Kentucky. He says the last estimate of the Cave gave 226 avenues, 47 domes, 8 cataracts, and 23 pits; yet all is not discovered, and centuries may elapse before it will be fully explored, if such a work is ever accomplished. The floor of of lime to the bushel; and such is the condition of the atmosphere of the Cave, that the dirt, after being lixivated and thrown pregnates as fully in three years as it was and falsehood : before lixivation. Thus the supply is inex. [From the Illinois State Register, Aug 23, 1844] haustable. Glauber and Epsom sa'ts are abundant in some apartments of the cave.-Pebbles, chalcedony, including geodes lined with crystals, flints, fibrous sulphate of lime, crystalized carbonate of lime, colite, chalk, red and gray ocre, calcarous spar, gypsum, and soda are found in the Cave.

THO ARRISON TRIAL-CHANGE OF VEN-UE ALLOWED .- Judge Carter, of Cincinnati, has granted a change of venue to Butler county in the case of Arrison, who is to be tried for the murder of Mrs. Allison. The Judge, in giving his opinion, alluded to the trial of Arrison for the murder of Mr. Allison, and said the verdict of the jury was such that it was scarcely possible to conceive how any twelve men with one grain of sense divided amongst them could have

How to DETECT MURDERERS .- W. D. Porter writes to the New York Herald that the following method will, in many cases, detect the perpetrators of a murder: "It is well known that all objects are actually painted or impressed on the retina of the eye. Should a person die by a violent death, the objects before the eve at the time, remain impressed on the retina. If the covering of the eve is scraped down thin, and a powerful magnifying glass applied, this image will be distinctly seen.— This was the first discovery of the daguerreotype. Any scientific physician can do

A REMARKABLE YEAR. - Mr. E. Merriam writes to the New York papers that-

The present year has been remarkable for long continuance of intense cold in winter, and for the long continuance of great heat in summer. Meteorites have been more numerous than usual this year in many parts of the globe, but earthquakes have been far less numerous than for many years past.

There is nothing on our record for sixtyeight consecutive years, either in cold or beat, as to intensity and long duration, which equals that of the year 1656.

Re A few years ago an intelligent gentleman had a contract to set out a hundred shade trees. He took the precaution to mark the north side of cach tree, and to plant the same side north when it was stransplanted. By this carefulness he save! the life of almost all that he moved. In this hemisphere, the sun shining upon the southern half of a tree constantly, stimulates the growth of the fibers on that considerably above the other, so that in many cases the gunual rings are much larger on ohis than on the other.

STRANGE OCCURRENCE .- Something very singutar is reported to have occurred on P.a Ridge, in Lincoln county, Tenn., a few weeks ago. A horse and plow—so the story goes—which a farmer was using in his field, sunk and disappeared in the earth, deaving a hole to which no bottom has yet been found, and in which the forms have forms found, and in which the farmer himself came near falling. His neighbors were called to the place, who by means of ropes, let him down in carpenter W H scarch of the horse and plow, to the depth of forty Chiles Jno W scarch of the horse and plow, to the depth of forty or fifty feet, but the farther he went the larger the hole appeared, and he called to his friends to pull him up, which they did. Several unsuccessful attempts were afterwards made to fathom the hole. The horse and plow have "gone the way of all the

THE PROGRESS OF LIFE .- Men rejoice when the sun is risen; they rejoice also when it goes down, while they are unconscious of the decay of their own lives. Men rejuice on seeing the face of a new season, as at the arrival of one greatly desired. Nevertheless the revolution of one season is the decay of human life. Fragments of drift-wood meet ing in the wide occan continue together a little space; thus parents, wives, children, friends and riches, remain with us a short time, then separate, -aud the separation is inevitable. No mo escape the common lot; he who mourns for departed relatives has no power to cause them to return One standing on the road would readily say to a number of persons passing by, I will follow you. Why then, should a person grieve, when journeying the same roud which has been assuredly travcled by all our forefathers! Life resembles a cataract rushing down with irresistible impetuosity. Knowing that the end of life is death, every right psinded man ought to pursue that which is con-nected with happiness and ultimate bliss,—Dub-lin University Magazine.

AMERICANS NAVIGATING THE RIVERS OF CHINA. -We perceive by a letter from Canton that a company of Americans are about building a couple of steamers to run on the rivers of China. This is a new idea, and something that must be productive of great good. The Chinese are a commercial peo-ple and are much given to trade, cheating and oth-er civilizing habits. The rivers of China are peculiarly adapted to steamboat navigation, and then look at her canals, one of which is nearly as wide as the Hudson, and as long as the Ohio river. The Empire is full of people, full of towns, and full of fabrics. These must make steamboating unusually profitable. We have an idea that the American Steamboat Company will make a fortune. They have no competitors, and for a long number of years will have a monopoly of the business.

Old Line Whigs.

[From the Missouri Statesman.] "HENRY CLAY WHIGS, COME TO OUR RESCUE !"-Yes, the Henry Clay Whigs are called upon by the Buchanan demagauges to come to their resoue! Is it not remarkably strange that men who, for a quarter of a century past, have denounced Mr. Clay and the Whig party for all that was abominable and hetrodux, should now have the impudence so far to insult the Old Line Whigs as to ask them to contradict the whole of their past lives by supporting Democrats! Have the Whigs forgotten the manner in which, for twenty years in Missouri, the iron heel of this party crushed them to the earth-proscribing them from every office, and gerrymandering the State so as to prevent the forty thousand Whigs in the State from having even one Representative in Congress? Have they murdeger, a Federalist, a gambler, a Sab-

THE MAMMOTH CAVE .- E. Meriam is bath-breaker, a perjurer, and a monarchist, furnishing the Portsmouth Journal with a who trampled under his feet the constitution and the laws! He was black-balled and caricatured, slandered and denounced, all round the Union; and now the party which outraged the moral sense of mankind by the atrocity of the libels they uttered against his character, are prating about the glorious and immortal CLAY, and for the purpose of humbugging Whigs out of their votes, are shedding crocodile tears the cave is covered by three or four feet of over his grave! We propose to let the dirt, yielding about three pounds of nitrate | people see the scandalous manner in which some of the Democratic papers attempted in 1844 to blacken his name by the publication of the vilest caricatures, and for this purpose we ask attention to the following back from the hoppers in the cave reim- outrageous and insulting piece of scanda
