

CANDY AND POISON.—A paper on "Colored Confectionery" was recently read before the British Association, from which we condense some valuable and novel information. We learn that for economy's sake, confectioners, in coloring their candies, &c., have recourse for their greens to Brunswick green, carbonate of copper, or arsenic of copper; for the yellows, to chromate of lead or gamboge; for their reds, to red lead, vermilion, or cinabar, and for their whites, to a white lead. There are only a few of the pernicious coloring agents used, and they are among the deadliest of poisons. The way in which the poisons are laid on, also deserves a word of passing remark. In some instances a very thin coating of the coloring matter is used, so as to spread over a very large surface a small portion of the material used; but in other cases the very reverse is the fact, and in one instance was procured from a piece of ornamental table confectionery not the size of a sugar almond, a quantity of arsenic of copper sufficient to destroy the life of a healthy adult. Confectioners have no reason to use these poisons, for there are harmless vegetable colors enough to answer their purposes.—Among these are—fer yellow, saffron, turmeric, French berries, Persian berries, quercitron bark, fustic wood and lakes of the last four colors. Reds—cochineal, lake ditto, including carmine, Brazil wood, madder and lakes of the two last colors.—Purples—madder purple, logwood and indigo, and lakes with indigo or limmas.—Blues—litmus and indigo. Greens—sap green (rhamnus catharticus,) mixtures of any of the vegetable yellows or lakes with indigo, including Persian berries and indigo. Nor would the products of their art suffer in their attractive appearance by the employment of such colors. We most strongly advise every one who values his health, and perhaps his life, as matters are at present constituted, sedulously to avoid partaking of articles of confectionery, exhibiting either blue or green, but especially of such as are green, these latter being but too frequently of a most deadly poisonous nature.

EFFECTS OF CHARCOAL ON FLOWERS.—The following extract cannot fail to be interesting to the botanist and chemist, as well as to every lady who has a rose-bush in her garden or a flower-pot in her parlor. It is from the Paris Horticultural Review. The experiments described were made by Robert Berard, who says:—"About a year ago I made a bargain for a rose-bush of magnificent growth and full buds. I waited for them to blow, and expected roses worthy of such a plant, and of the praise bestowed upon it by the vendor. At length, when it bloomed, all my hopes were blasted. The flowers were of a faded color, and I discovered that I had only a middling multiflora, stale colored enough. I therefore resolved to sacrifice it to some experiments which I had in view. My attention had been captivated with the effect of charcoal, as stated in some English publications. I then covered the earth in which my rose-bush was, about half an inch deep with pulverized charcoal. Some days after, I was astonished to see the rose, which bloomed as fine as a lively rose color as I could wish."

ENJOY A LAUGH.—Who does not love to enjoy a laugh at times? Where is the man or woman that doesn't find it a relief to smile and be happy? And who is so dull that he cannot occasionally enjoy, right heartily, a well-earned or a well-related jest? Perhaps we have been blessed with an extraordinarily pleasant disposition—and perhaps not; nevertheless, we can laugh and enjoy it, too.

A man of virtue is an honor to his country, a glory to humanity, a satisfaction to himself, and a benefactor to all the world. He is rich without ostentation, courteous without deceit, and brave without vice.

GO IT OFF HER MIND.—Children and fools, says and old adage, always tell the truth. "Mother sent me," said a little girl to a neighbor, "to come and ask you to take tea with her this evening."—"Did she say what time, my dear?"—"No, ma'am; she only said she would ask you, and then the thing would be off her mind; that's all she said."

A teacher once asked a bright little girl "What country is opposite us on the globe?"
"I don't know, sir," was the answer.
"Well, now," continued the teacher, "if I were to bore a hole through the earth, and you were to go in at this end, where would you come out?"
"Out of the hole, sir," replied the pupil, with an air of triumph.

Mrs. Partington inquires what kind of razors are employed in shaving notes. Mr. Pe. respectfully informs her that they are generally razors of money.

A Toast.—Woman: She is the only endurable aristocrat; elects without votes, governs without law, decides without appeal.

Lightning never strikes but once in the same place; therefore, let the man whose first wife was a good one, never marry again.

Handsome features alone are incapable of expressing real beauty, as speech alone is incapable of expressing wit.

More evil truths are discovered by the corruption of the heart than by the penetration of the mind.

Twilight Meditations.
Silently the shades of evening
Gather round my lonely door;
Silently they bring before me
Fancies I shall see no more.
Oh! the lost, the forgotten,
Though the world be all forgot;
Oh! the shrouded and the lonely,
In our hearts they perish not.
Living in the silent hours,
Where our spirits only bleed—
They, unlinked with earthly troubles,
We, all hoping for its end.
How such holy memories cluster,
Like the stars when storms are past;
To bring up to that heaven
We may hope to gain at last.

THE MARRIED MAN.—How is it that girls can always tell a married man from a single one? The fact is indisputable. The philosophy of it is beyond our ken. Blackwood says that the fact of matrimony or bachelorship is written so legibly in a man's appearance, that no ingenuity can conceal it. Every where there is some inexplicable instinct that tells us whether an individual, (whose name, fortune, and circumstances are totally unknown) be he, or be he not, a married man. Whether it is a certain subdued look, such as that which characterizes them from the lords of the desert, we cannot tell; but that the truth is so, we positively affirm.

If we could read the secret history of our enemies, we should find in each man's life sorrow and suffering enough to disarm all hostility.

SANDS' SARSAPARILLA.
For Purifying the Blood,
AND FOR THE CURE OF
Scrophulous, Mercurial Diseases, Rheumatism, Catarrhus Vesicæ, Strabismus, Ulcers, Liver Complaint, Dyspepsia, Bronchitis, Nephritis, Lumbago, White Swelling, Hip Disease, Fever Sore, Female Complaints, Erysipelas, Pimples, Bites, Old Sores, General Debility,
AND AS A
GENERAL TONIC FOR THE SYSTEM
IT IS UNRIVALLED.

The various diseases which have their origin in the system of the body, may be compared to signals of distress thrown up by Nature in defiance that the vital organization within needs cleansing and purifying. The assistance afforded by the normal life existed in the blood. It is an indisputable fact.

HEALTH DEPENDS
Upon the purity of the blood. If the skin is in an unnatural state, as in Scrophulous, Lepra, and all Diseases of the skin, it is evident that the system within needs cleansing and purifying. The assistance afforded by the normal life existed in the blood. It is an indisputable fact.

STILL FURTHER TESTIMONY.
Wm. A. Brewster, Com. June 18th 1857.
I have used SANDS' SARSAPARILLA, in the cure of my Scrophulous disease, and in the cure of my Rheumatism, and in the cure of my Liver Complaint, and in the cure of my Female Complaint, and in the cure
