## MECHANICS, INVENTORS,

Manufacturers, and Farmers. THE SCIENTIFIC AMERICAN has now reached its Pourteenth Year, and will enter upon a New Volume on the 11th of September. It is the only weekly publication of the kind now issued in this country, and it has a very extensive circulation in all the States of the Union. It is not, as some might suppose from its title, a dry, abstrace work on technical science; on the contrary, it is deals with the great events going on in the scentific, mechanical, and industrial worlds, as to please and instruction, and industrial worlds, as to please and instructional. ieal, and industrial worlds, as to please and instruct every one. If the mechanic or artisan wishes to know the best machine in use, or how to make any substance employed in his business—if the housewife wishes to get a recipe for making a good color, &c.,—if the inventor wishes to know what is going on in the way of improvements—if the manufacturer wishes to keep posted with the times, and to enjoy the best facilities in his business—if the manufacturer wishes to keep himself familiar with the progress made in the chemical lab ratory, or in the construction of telegraphs, steamships, railroads, respects, mowers, and a thousand other mischines and appliances, both of peace and war—all these desiderate can be found in the Scrinstrian Canada, and not elsewhere. They are here presented in a reliable and interesting form, adapted to the comprehension of minds uplearned

Arla Paddock's Book of Plates and 11ustrated Counterfeit Detector for 1856, he says Hostetter's Bitters are really what their name implies, a tonic and gentic stimulant, calculated to act upon the system as a medicine, and not, as is too often the case, a mere invention under which to indulge in tippling. We would not venture to make this statement, did we not feel sure it would ica, a tonic and gentic stimulant, calculated to be correborated by the willing testimony of thou-cands all over the United States, and especially throughout the western and southern parts, where certain disorders prevail, which require such a pre-scription. We are assured by a gentleman of large experience, who is a 'traveled man' and whose judgment and impartiality may be relied upon, that 'Hostetter's Briters' are a sure thing on Fuver and Ague, that scourge of our newly settled regions; which, indeed, has within the past year, prevailed to an alarming extent in sections generally exempt."
