only weekly publication of the kind now issu ued III this country, and it has a very extensive circulation in all the States of the Union. It is not, as some might suppose from its title, a dry, abstruse work on technical science; on the contrary, it => deals with the great events going on in the scientific, mechan ical, and industrial worlds, as to please and instruct every one. If the mechanic or artisan wishes to know the best machine in use, or how to make any substance employed in his basiness—if the house-wife w shes to get a recipe for making a good color, &c.,—if the inventor wishes to know what is going on in the way of hoprovements---If the manufage turce wishes to keep posted with the times, and to enjoy the best factifies in his business---if the man of leisure and study wishes to keep himself familiar with the progress made in the chemical laboratory, construction of telegraphs, steamsh or in the railroads, reapers, mowers, and a thousand other machines and appliances, both of peace and war-all these desiderata can be found in the SCIEN-TIFIC AMERICAN, and not elsewhere. They are here presented in a reliable and interesting form, adapted to the comprehension of minds unlearned in the higher branches of science and art.

Tr'In Paddock's Book of Plates and Ilstrated Counterfeit Detector for 1856, he says; "Hostetter's Bitters are really what their name implies, a tonic and gentic stimulant, calculated to act upon the system as a medicine, and not, as is too often the case, a mere invention under which to indulge in tippling. We would not venture to make this statement, did we not feel sure it would he corroborated by the willing testimony of thou-sands all over the United States, and especially throughout the western and southern parts, where certain disorders provail, which require such a prescription. We are assured by a gentleman of large experience, who is a 'traveled man' and whose judgment and impartiality may be relied upon, that 'Host tter's Bitters' are a sure thing on Fover and Ague, that scourge of our newly set-tled regions; which, indeed, has within the past year, prevailed to an alarming extent in sections generally exempt."
