

Miscellaneous. The Financial Reformer states that the present British Parliament is composed of 225 representatives of the aristocratic interest, 208 representatives of the military and naval interests, 119 representatives of the legal interest, 27 representatives of the mercantile and manufacturing interests, and 43 representatives of miscellaneous interests.

The chaparral upon the hills near Placerville, Cal., presented a novel peculiarity the past season. The seed-pods, which are about the size of a marrowfat pea, are just now ripening, and as fast as they matured they shot themselves off with a banging noise, like miniature hand grenades. At midday, when the sun shone fairly upon a thicket of the bushes, the popping was incessant, and as each bulb exploded, the seeds were hurled into the air to the height of fifteen or twenty feet.

Col. James Glover, of the Overland Mail Company, informs the Gallatin (Tenn) Examiner of the existence of a remarkable spring 280 miles east of El Paso, on the road leading to San Antonio. It is fully 150 feet in diameter, and has been sounded to the depth of 8000 feet without finding bottom.

At a trial of reaping machines on the Emperor Napoleon's farm, near St. Cloud, on the 19th of July, the first prize for foreign machines was awarded to an English firm, and the second to an American machine by Cranston, improved by Brood of London.

A pretty girl attended a ball on West recently, decked off in short dress and pants. The other ladies were shocked! She quietly remarked that if they would pull up their dresses about the neck as they ought to be, their skirts would be as short as hers!

A correspondent writing from Niagara Falls says that where the Suspension Bridge originally sagged only two or three inches under the weight of a train, it now sags nearly twenty inches. The general impression in the neighborhood is that this great work of art will one of these days give way and fall into the river. Visitors now walk over the bridge, instead of crossing in the trains as formerly.

A table compiled from official documents gives the number of Free Masons in the United States as 211,538, and the income of the Lodges as about 1,450,000.

The State of South Carolina is taking a census, and in seventeen parishes there is a decrease of over 5,000 whites since 1855, while the blacks have largely increased.

FINDING DROWNED PERSONS BY QUICKSILVER.—A correspondent of the Troy Times gives the following narrative of an occurrence at Shrewsbury Lake, Vt., as coming under his own observation:

"The lake is noted now on account of the death of a young man, a conductor on the Rutland and Burlington Railroad, who was drowned in it a short time ago. At the time he, with several others, were playing, rocking the boat, making it 'dip water'—when, unluckily, they were swamped, and this young man, the best swimmer in the lot, was drowned. After a long and almost hopeless search after the body—a very novel idea was suggested, which, after trial, proved successful in leading to the discovery of his whereabouts. About three ounces of quicksilver was put into a loaf of brown bread, well baked and thrown out into the lake. The loaf was discovered to move directly against the wind; soon it stopped, whirled around several times and sunk. They immediately rowed to the place and threw out the grapplers—the first time they hooked his face, the second time the hook fastened to his boot, and he was hauled into the boat. Where he was found the water was 70 feet deep. In his pockets were a large silver watch and a considerable quantity of silver money—which caused the attraction of the quicksilver, and led to the discovery of his watery grave. The accident, place, and singular circumstances connected with the sad affair render it remarkable.

Sheriff's Sale.
BY VIRTUE of an execution issued out of the Circuit Court of the State of Oregon for the county of Yamhill, and to me directed, upon a judgment rendered in said court in favor of Wayne C. Hembree against Clayton Richardson for the sum of \$350.00 debt, and \$13.75 costs, together with interest accruing costs, and for want of sufficient personal property to satisfy said execution, I have levied upon the following described real estate as the property of the said Clayton Richardson, situated in the county of Yamhill, State of Oregon, to wit:—All the interest he has in and to lots Nos. THE SCIENTIFIC AMERICAN has now reached its Fourteenth year, and will enter upon a New Volume on the 11th of September. It is the only weekly publication of the kind now issued in this country, and it has a very extensive circulation in all the States of the Union. It is not, as some might suppose from its title, a dry, abstract work on technical science; on the contrary, it deals with the great events going on in the scientific, mechanical, and industrial worlds, as to please and instruct every eye. It is the mechanic or artisan wishes to know the best machine in use, or how to make any substance employed in his business—if the housewife wishes to get a recipe for making a good color, &c.—if the inventor wishes to know what is going on in the way of improvements—if the manufacturer wishes to keep posted with the times, and to enjoy the best facilities in his business—if the man of leisure and study wishes to keep himself familiar with the progress made in the chemical laboratory, or in the construction of telegraphs, steamships, railroads, trappers, miners, and a thousand other machines and appliances, both of peace and war—all these desiderata can be found in the SCIENTIFIC AMERICAN, and not elsewhere.
