

The Oregon Argus.

W. L. ADAMS, EDITOR.

OREGON CITY:

SATURDAY, OCTOBER 22, 1859.

The Difference.

It was only a few moons ago that the Rev. Mr. Stewart came to Oregon as an emissary sent from California by the M. E. Church South to build up the Democratic party and prepare the way for an organization of Pro-Slavery Methodism among us.

South thus coolly treated by men professing to possess the real notion of genuine Texas Methodism, of course raised the ire of the missionary propagandists. They at once decided that while Bishop Jones and his friends had on the robes of Texas Methodism, the notion that pervaded them was the notion of Massachusetts—that while the 'voice was the voice of Jacob, the hands were the hands of Esau.'

S. OF T.—The Grand Division of the Sons of Temperance for Oregon held its annual meeting at Portland on the 11th inst. The time of holding the sessions of the Grand Division was fixed on the fourth Wednesday of April and October.

STREET IMPROVEMENT.—Every one will be glad to hear that the contract for grading Main street, between Fourth and Fifth, has been given to Mr. Athey on the same terms as the other contracts, we suppose.

DELUSION'S PAPER.—We learn that the Oregon Democrat, which is to be the organ of the Jo Lane pro-slavery sectionalists in Oregon, will make its appearance in a short time—probably in two weeks.

BALCH HUNG.—Last Monday Danford Balch was hung in Portland in presence of a crowd of seven or eight hundred people—some twenty-five or thirty of whom were women. No disturbance took place.

Salem will appear next week.

Distinguished Departures. We understand that the steamship Columbia, besides some three thousand boxes of apples, carried away on her last trip the carcasses of a District Judge named Dearly, a Senator called Lane, and a person bearing credentials as a member of Congress, who, while a Know Nothing Representative in California, was known as Lansing Stout.

THE WEATHER.—The present fall is decidedly the most favorable one we have had since the year 1845. The early rain commenced in August and moistened the ground enough to sprout grain.

GRAPE.—Mr. Peter A. Weiss has presented us with a bunch of grapes of the Isabella variety, which are larger and better than those brought here from California.

From the Indian Country.—New Gold Discoveries, &c. DES CHUTES, Oct. 16, 1859. ED. ARGUS: We up here don't know any thing about that massacre the Portland papers tell of as having occurred near Grand Ronde lately.

ED. ARGUS: We up here don't know any thing about that massacre the Portland papers tell of as having occurred near Grand Ronde lately. We made considerable inquiry about it, but find there is no foundation in the report whatever, except it be, perhaps, that there was a few cattle and horses taken from the immigrants about Grand Ronde.

KELLY'S TEMPERANCE HOUSE.—By reference to the new advertisements in this week's issue, it will be seen that Mr. E. D. Kelly has opened a new boarding house in this city. He will be remembered as an old resident here, having been engaged in the same business in this city several years ago.

THE STEAMER COL. WRIGHT IS EXPECTED TO start this week, when there will be a chance for miners to go by steamer to within a few miles of the reported mines.
