Ladies suffering with d seases peculiar to their sex will be treated with the utmost care and secrecy. They may most confidentially apply for medical aid, either by let-

and permanent relief from suffering. Through the enormous success the Dr has had, especially in the treatment of the above discusses, he is enabled to promise a speedy and permanent cure, where medical skill can possibly effect a cure. Aithough the Dr. was always averse to advertising, he had at last to submit to the many requests of his numerous patients throughout the State, who consider it as justice to the suffering who can be benefited by his treatment and advice. Thousands of patients in California have been saved by his mode of treatment, and will certify its superiority to any other they have ever been treated by. The Dr. never uses mercurial or min-eral po sons; he has more efficient substitutes of the vegetable kingdom. He will never expect pay where he does not effect a complete cure.

MECHANICS, INVENTORS, Manufacturers, and Farmers.

THE SCIENTIFIC AMERICAN has now renched its Fourteenth Year, and will enter upon a New Volume on the 11th of September. It is the only weekly publication of the kind now issued in this country, and it has a very extensive circulation in all the States of the Union. It is not, as some might suppose from its title, a dry, abstrase work on technical science; on the contrary, it so deals with the great events going on in the scientific, mechanical, and industrial worlds, as to please and instrucevery one. If the mechanic er arisen wishes to know the best machine in use, or how to make any substance employed in his business—if the house wife wishes to get a recipe for making a good color &c ,—if the inventor wishes to know what is going on in the way of improvements—if the manufacturer wishes to keep posted with the times, and t enjoy the best facilities in his business—if the man of lesure and study wishes to keep himself familiar with the progress made in the chemical laboratory or in the construction of telegraphs, steamships railroads, reapers, mowers, and a thousand other machines and appliances, both of peace and war—all these desiderata can be found in the Scientific American, and not elsewhere. They are here presented in a reliable and interesting form.
