Young America Broad-cast Seed-Sower!

Simplicity, Utility, Durability, and Cheapness Combined!

R.S. RICKEY'S IMPROVED

BROAD - CAST SEED - SOWER. Patented, March 29, 1859. THIS muchine is well adapted to sowing al

kinds of grain and grass seed, hemp seed. It sows more regularly than can possibly be sown by hand, or any other machine ever intro-duced. It is perfectly simple in its construction, and not liable to get out of order; it is easily un-derstood, and does away with the hard manual labor of sowing grain-doing the same amount of labor in two hours that could be done in one day by the ordinary method of sowing. The machine can be carried while being used, as it we glis but can be carried while being used, as it we glis but five pounds, or, by a simple frame, it can be attached to a wagon. When it is carried, it is strapped on the body of the operator, a strap to go across the right shoulder and under the left arm, also a strap buckied around the bely, and a trap from the top of the sack, around the meck. Should the Machine by accident get broken, any timer can repair it—although by proper case the Machine will last a life time. But to be appreciated, it must be seen.

It will sow the various grains and seeds the 50 feet at a cast, or 100 ft. at a round Oats, H. G. seed, 36 " Timothy a'd, 25 "

Other grains and seeds in the same proportion. It will also sow wet and limed grain perfectly well County Rights for Sale on Good Terms.
