Young America Broad-cast Seed-Sower!

Simplicity, Utility, Durability, and Cheapness Combined!

R.S. RICKEY'S IMPROVED BROAD - CAST SEED - SOWER.

Patented, March 29, 1859. THIS machine is well adopted to sowing all kinds of grain and grass seed, hemp seed, &c. It sows more regularly than can possibly be sown by hand, or any other machine ever introduced. It is perfectly simple in its construction, and not liable to get out of order; it is easily un derstood, and does away with the hard manual labor of sowing grain-doing the same amount of labor in two hours that could be done in one day by the ordinary method of sowing. The machine can be carried while being used, as it we gha bu can be carried while being used, as it we gas but five pounds, or, by a simple frame, it can be at-tached to a wagon. When it is carried, it is strapped on the body of the operator, a strap to go across the right shoulder and under the left arm, also a strap buckled around the bedy, and a strap from the top of the sack, around the neck. Should the Machine by accident get broken, any timer can repair it—although by proper care the Machine will last a life time. But to be appreciated, it must be seen.

It will sow the various grains and seeds the following disances:
