become known, on account of its various other reme-dial properties.

In all cases of a dropsical tendency, it is generally the only remedy required, when adopted in the early stage of the disease.

In dyspepsia analolies, when taken in proper quan-tities, as a diet drink, and especially at dinner, it is found by uniform experience to be entinently efficacious in the most obstante cases, when even the best of the usual remedies have failed to afford more than tempo-

m the most obstinate cases, when even the best of the same small remedies have failed to afford more than temporary relief. In cases of flatelency, it is an immediate and invariable specific, and it may be administered in diluted and proportionate quantities, even to young infants, in all those parroxysms of griping pain in the stomach and bowels to which they are especially subject, as well as the choice of grown persons.

Its judicious adoption in connection with the principal meals, or when a sense of exhaustion dictates it use, never fails to relieve the debility attendant upon protracted chronic maladies, low temperament and exhausted vital energy, by whatever cause induced. These are facts to which many of the most eminent medical men, both in England and the United States, have borne testimony, and which are corroborated by the highest writ on authorities.

is prepared expressly to meet such exigencies, and to act as we know it will act, as an antidote we confidently prescribe it as the very best article in the country. The name of "Aromatic Schiedam Schnappe" has never been attached in any way to this article. In first presenting the "LONDON CLUB HOUSE GIN" to the public, my aim was to give them a pare and unadulterated article of Gin, and to call it by its right name. The success attending its introduction and extensive sale in California is a sufficient guarantee of the high appreciation of the article by consumers.
