One of the chief privations which the citizens of Oregon have been compelled to endure, has been the want of a lequate mail facilities. The increase of the mail service, by the establishment of new routes, and more frequent communication by the old ones, has been the burden of air petitions to Congress, and of our letters to our Delegate, for many years past. It was supposed that the additional influence in federal uffairs which Oregon would acquire by her admission into the Union, would secure the additional unil service so necessary to the comfort and convenience of our citizens. But since the change in our political contracts.

Hedges, for the sam of four thousand dollars—the mails to be carried but once a week -leaving Oregon City Monday oming and returning there Thursday night-only ne twice a week; and, although that service was sidered mengre enough by those who were supplied by it, it was nevertheless a great accommodatio the citizens of the Willemette Valley. A very slight increase of the compensation would have pro-vided a tri weekly mail service, throughout the whole igth of the valley; and our citizens thought they and a right to demand and to expect this additional service. The Oregon Stage Co apany, whose bid was forwarded to the Department of the same time with that of Capt Hodges, offered to earry the mails sens. ekly during the six winter months, and tri-weekly ng the six summer months, for the sum of five meand five bundred dollars. This bid was rejected. though it was but fitteen lendered dollars biginer time that of Cupt. Hedges for less than one-half the service. It will be borne in mind that Lame's paltry excuse for the chamissal of Mr. Brown from the position of messenger to the Ludian Superimendency of Oregon was that the mail Leithtes were now adequate to the supply of the necessary communication between the ollace of the Superintendency and the different agencies. We pointed out, but week, the fallacy and absumity of this excuse, from the indisputable fact that there had been us increase of mult facilities to the new of any of them, since the establishment of the Superintendency. We suggested what is doubtless the fait, that Lame had probably personned Mr. Latian Commissioner Green wood that there had been intell a large increase of mail service in Oregon, rondering the messenger a useless appendings to the Superintendency large.
